Practice B Introduction To Sequences:

Research on Physics Education E.F. Redish, M. Vicentini, 2004-08-09 Physics Education research is a young field with a strong tradition in many countries. However, it has only recently received full recognition of its specificity and relevance for the growth and improvement of the culture of Physics in contemporary Society for different levels and populations. This may be due on one side to the fact that teaching therefore education is part of the job of university researchers and it has often been implicitly assumed that the competences required for good research activity also guarantee good teaching practice. On the other side and perhaps more important is the fact that the problems to be afforded in doing research in education are complex problems that require a knowledge base not restricted to the disciplinary physics knowledge but enlarged to include cognitive science, communication science, history and philosophy. The topics discussed here look at some of the facets of the problem by considering the interplay of the development of cognitive models for learning Physics with some reflections on the Physics contents for contemporary and future society with the analysis of teaching strategies and the role of experiments, the issue of assessment and cultural aspects. Information is also given on the organizations involved in connecting various aspects of Physics Education: the International Commission on Physics Education, the European Physical Society and the European Physics Education Network.

Practice Long Cases for the Part B Final FRCR Examination Jennifer Davidson, Beth Shepherd, Sunderarajan Jayaraman, 2024-11-01 The FRCR Part 2B is a demanding examination consisting of an oral examination, a rapid reporting session and a reporting session also known as the long cases. Preparation can prove very stressful; the multiple parts of the examination rely on different and distinct techniques. This succinct examination guide and DVD contain over 4700 radiological images allowing for many more opportunities using the print off examination format sheet and digital images to recreate examination conditions. Model sample answers are provided for each question to aid in self-marking and revision. With a complete introduction to the examination including the marking scheme and top tips for success, candidates will welcome the chance to practise papers and check their examination technique in this unique guide. This examination is the culmination of years of hard work and training and the RCR rightly makes it a difficult and robust examination to challenge trainees and ensure they have reached an appropriate standard. Preparation is absolutely vital for success. Jennifer Davidson, Beth Shepherd and Sunderarajan Jayaraman in the Introduction.
