Political Culture and the Making of Modern Nation-States Edward Weisband, Courtney I P Thomas, 2015-11-17 This book focuses on transformations of political culture from times past to future present. It defines the meaning of political culture and explores the cultural values and institutions of kinship communities and dynastic intermediaries including chiefdoms and early states. It systematically examines the rise and gradual universalization of modern sovereign nation states. Contemporary debates concerning nationality, nationalism, citizenship and hyphenated identities are engaged. The authors recount the making of political culture in the American nation state and look at the processes of internal colonialism in the American experience, examining how major ethnic, sectarian, racial and other distinctions arose and congealed into social and cultural categories. The book concludes with a study of the Holocaust, genocide, crimes against humanity and the political cultures of violation in post colonial Rwanda and in racialized ethno political conflicts in various parts of the world. Struggles over legitimacy in nation building and state building are at the heart of this new take on the important role of political culture.

Cross-Cultural Perspectives on Couples with Mixed HIV Status: Beyond Positive/Negative Asha Persson, Shana D. Hughes, 2016-10-24 This edited volume presents a detailed portrait of couples living with mixed HIV status where one partner is HIV positive and the other negative. Readers will come to understand the various and complex ways in which these mixed status or serodiscordant couples build a life together within the shadow of HIV related stigma. Spanning the globe, coverage explores serodiscordance as a negotiated practice and process inseparable from the social context in which it is situated. The book shows how couples draw on diverse and sometimes contradictory cultural discourses of medicine, romance and normality to make sense of and manage their mixed HIV status and any perceived risks not uncommonly in ways that depart from prevailing HIV prevention messages. Throughout compelling personal stories accompany the empirical research, sharing the firsthand experiences of men and women in serodiscordant relationships. Bringing together research from diverse disciplines and geographical regions, this book contributes important insights for future HIV health promotion as well as offers new knowledge to scholarship on the cultural intersections of illness and intimacy. It will appeal to a broad audience working across the fields of HIV health, gender, sexuality, development and human rights.
