The Intellectual Journey of Humanity to Adulthood* Hippokratis Kiaris, 2022 Civilizations can be perceived as living human beings that are born mature age and ultimately die and disappear passing their legacy to the future generations These transitions may be projected to the different stages of cognitive development of children The Western Civilization which embodies our current

state of cultural advancement from the Classic Greek to the modern period can be paralleled by the gradual transitions of human beings toward adulthood From this perspective the ancient Greek era resembles the toddler years of humanity at which the first why type questions are being asked The theocratic period that followed until the Renaissance can be seen as our childhood when people lived their lives under the tight boundaries set by religious authorities The period spanning from the Enlightenment until almost the end of the 20th century can be considered as our teenage years when people rediscover their past are liberated from superstition and set the path forward based on reason by a manner at which the distinction between plausible and feasible is vague Within this scheme postmodernism also finds its place in our teenhood The last few decades from this perspective signify our entrance to adulthood at which major questions are considered answered or at least settled and the only path forward perceived as feasible is the one that is followed already a state that is bringing us closer to our intellectual aging and its inevitable death Some signs of aging related pathologies are already manifested in today s technology intensive society By identifying our intellectual age and by appreciating our health status we may be able to proactively delay or even avert our intellectual aging and death

**An Essay on Western Civilization in Its Economic Aspects** William Cunningham,1898      **A History of Orthodox, Islamic, and Western Christian Political Values** Dennis J. Dunn,2016-09-13 The book reveals the nexus between religion and politics today and shows that we live in an interdependent world where one global civilization is emerging and where the world s peoples are continuing to coalesce around a series of values that contain potent Western overtones Both Putin s Orthodox Russia and regions under the control of such Islamist groups like ISIS and Al Qaeda resent and attempt in a largely languishing effort to frustrate this series of values The book explains the current tension between the West and Russia and parts of the Muslim world and sheds light on the causes of such crises as the Syrian Civil War Russia s aggression against Ukraine and acts of terrorism such as 9 11 and the ISIS inspired massacres in Paris It shows that religion continues to affect global order and that knowledge of its effect on political

identity and global governance should guide both government policy and scholarly analysis of contemporary history
