Today's Universities: Combining Rigour with Relevance Michigan State University, 2015-08-05 Last year the Dubai International Conference in Higher Education considered the global challenge of sustaining success in higher education This year we posed the question How do universities combine rigour with relevance Once again we have invited all those involved in the higher education community to come together to share insights related to the provision of education that is rigorous and at the same time relevant The three key premises of the conference are these 1 Higher education institutions must demonstrate their relevance to the needs of the workforce in a landscape of constant and rapid economic and social change 2 They must maintain the rigorous academic standards that are the hallmark of a quality institution 3 With the accelerating power and reach of the web universities must meet unprecedented challenges as technological innovation disrupts their traditional business model Unless individual universities prove that they are capable of adapting successfully in the face of these three pressures their futures may be uncertain

Tunnel Visions Michael Riordan, Lilian Hoddeson, Arienne W. Kolb, 2015-11-20 A detailed and engaging account of the development of the superconducting supercollider one of the largest scientific undertakings in the United States Journal of American History Starting in the 1950s US physicists dominated the search for elementary particles aided by the association of this research with national security they held this position for decades In an effort to maintain their hegemony and track down the elusive Higgs boson they convinced President Reagan and Congress to support construction of the multibillion dollar Superconducting Super Collider project in Texas the largest basic science project ever

attempted But after the Cold War ended and the estimated SSC cost surpassed ten billion dollars Congress terminated the project in October 1993 Drawing on extensive archival research contemporaneous press accounts and over one hundred interviews with scientists engineers government officials and others involved Tunnel Visions tells the riveting story of the aborted SSC project The authors examine the complex interrelated causes for its demise including problems of large project management continuing cost overruns and lack of foreign contributions In doing so they ask whether Big Science has become too large and expensive including whether academic scientists and their government overseers can effectively manage such an enormous undertaking Focusing on the scientific technical and political conflicts that led to delays ever rising costs and eventually the SSC s cancelation by Congress Tunnel Visions is a true techno thriller Burton Richter winner of the Nobel Prize in Physics Most good science stories are tales of discovery and success but failure can be just as riveting Here two historians and an archivist describe the greatest particle physics experiment that never was Scientific American [ERISA](#) Paul J. Chougule, 2021-04-15 1 1 NEED AND BACKGROUND 1 1 1 PHYSICAL EDUCATION AND SPORTS WITHIN SOCIETY Man is a social animal both by need and necessity Social institutions are born with cultural influences Social institution is one of the products of culture Institutions are necessary to maintain social order and control human behavior Social institutions are born to satisfy human needs All the needs and desires of the individuals and human beings are met by social institutions Social institutions are simply social habits For example the habits of shaving in the morning uttering prayers before going to bed Habits are systematized instituted or established by groups Institutions may also be defined as habitual ways of living together which have been sanctioned systematized and established by the authority of communities An institution therefore may be type of group In this sense the family is an institution and if it conducts itself in institutionalized ways Robert Bierstead considers that institutions as an organized way of doing something Institutions are socially important because they transfer cultural elements from one generation to another For example the father of the family teaches his sons and daughters about the family the way of life economic way of life and religious way of life A social institution introduces unity in human behavior A social institution also controls the conduct and character of man in the society Modern life is not as simple as that of ancient times It is complex The complexity has been produced by our growing and different needs The needs are self preservation Self perpetuation and self expression These needs are met only by social institutions Social institutions represent the social structure of the society We can conclude that the social relationships include common values and procedure to achieve basic needs of society Common value means shared ideas and goals procedure means the accepted standardized norms and the social relationships include the behavior of the people A Youb 2008

Braverman, 2015-04-22 Wild Life documents a nuanced understanding of the wild versus captive divide in species conservation It also documents the emerging understanding that all forms of wild nature both in situ on site and ex situ in captivity may need to be managed in perpetuity Providing a unique window into the high stakes world of nature conservation Irus Braverman describes the heroic efforts by conservationists to save wild life Yet in the shadows of such dedication and persistence in saving the life of species Wild Life also finds sacrifice and death Such life and death stories outline the modern struggle to define what conservation should look like at a time when the long established definitions of nature have collapsed Wild Life begins with the plight of a tiny endangered snail and ends with the rehabilitation of an entire island Interwoven between its pages are stories about golden lion tamarins in Brazil black footed ferrets in the American Plains Sumatran rhinos in Indonesia Tasmanian devils in Australia and many more creatures both human and nonhuman Braverman draws on interviews with more than one hundred and twenty conservation biologists zoologists zoo professionals government officials and wildlife managers to explore the various perspectives on in situ and ex situ conservation and the blurring of the lines between them
