

SADLIER WE BELIEVE UNIT 2 STUDY GUIDES

Full on the Block: Handouts for all 5 chapters. (Chapters 1-5)

1. The first step in the process is to identify the problem or goal. This involves understanding the current situation and what needs to be achieved.

2. Next, it is important to gather relevant information and data. This can be done through research, interviews, or observation.

3. Once the information is gathered, the next step is to analyze it. This involves identifying patterns, trends, and potential causes.

4. After analysis, the next step is to develop a plan or strategy. This should outline the steps needed to achieve the goal.

5. The final step is to implement the plan. This involves putting the strategy into action and monitoring progress.

6. Throughout the process, it is important to communicate and collaborate with others. This can help ensure that everyone is on the same page and working towards the same goal.

7. Finally, it is important to evaluate the results of the process. This can help determine if the goal was achieved and if the process was effective.

— *Journal of the American Medical Association*
