charge du vieillissement centre hospitalier Simone Veil Blois Orthodontie des plus de 50 ans Pierre Canal, Christine Muller, 2023-09-12 Depuis le début des années 2000 les adultes de plus de 50 ans les seniors ont de moins en moins de réticence pousser les portes des cabinets d'orthodontie dont l'organisation est souvent parfaitement réglée autour d'un patient le adolescent. Pourtant l'orthodontie du senior est bien différente de celle du jeune patient tant sur les plans techniques que biologique psychologique et esthétique. En effet les seniors viennent avec des exigences une histoire et des contraintes physiologiques qui diffèrent de celles de l'adolescent. Dans ce contexte prendre conscience des spécificités du traitement du senior est fondamental pour assurer une prise en charge optimale. Cet ouvrage a vocation de créer en détail le vieillissement bucco dentaire et mettre en lumière les caractéristiques du traitement orthodontique des plus de 50 ans. Ainsi il s'adresse tous ceux que la question du vieillissement bucco dentaire intéresse. Fondé sur le partage de connaissance et d'expérience il est constitué de 50 fiches synthétiques ponctuées de conseils et d'astuces et rassemble plus de 1000 photos cliniques afin d'éduquer notre esprit et notre œil. Cet exercice particulier rédigé par des praticiens expérimentés il est résolument pratique destiné à apporter des réponses aux questions que se pose le clinicien lors du traitement des patients de plus de 50 ans.

Handbook of Research on Elderly Entrepreneurship Adnane Maâlaoui, 2019-04-26 This handbook introduces readers to the concept of elderly entrepreneurship and analyzes key issues concerning individuals and institutions. In addition it presents theoretical and empirical studies exploring the reasons why elderly persons choose to pursue entrepreneurship despite their advanced age. To investigate this comparatively new entrepreneurial phenomenon the contributors address psychological sociological and gerontological aspects and share unique interdisciplinary insights. The book's chapters are methodologically diverse and the scale of analysis ranges from individual cases to country level patterns. At a time when the world's major economies are facing a demographic challenge due to ageing populations elderly entrepreneurship may provide new economic opportunities and motivate more inclusive policymaking.

Future Elderly Living Conditions in Europe Joëlle Gaymu, 2008 In FELICIE the focus is on the health of the elderly and on the resources at their disposal to cope with the severe impairments liable to affect their quality of life. Not only personal resources economic well being and educational attainment but also the potential support of close kin i.e. their partner of course and their children if available. This leads to the more specific question of care. One major conclusion of the FELICIE study is that the disabled older adults of the future will fare better on average than those of today both on a personal level thanks to higher levels of education and on a social level thanks to the more frequent presence of their spouse and at least potentially their children. The conclusions are based on the experience of nine countries across Europe north Finland Netherlands west Belgium France Germany United Kingdom south Italy Portugal east Czech Republic. In terms of both demographic and social indicators the participating countries are fairly representative of their region.
