Alternative News Reporting in Brazil Claudia Sarmento,2023-06-23 This book examines the emergence of alternative forms of news reporting in Brazil with a focus on progressive not for profit initiatives In combining different genres of non commercial journalism this study allows us to better understand the potential of alternative news producers in times of continuing technological shifts and their efforts to diversify the news production Sarmento explores a range of significant questions including what does it mean to practice alternative journalism To what extent do non mainstream practices subvert the taxonomy of news values Do alternative journalists adhere to or reject journalism s core values And more specifically as more and more journalists or media producers are collecting disseminating and interpreting news without being employed by large media groups what insights can they provide in relation to the economics of digital journalism Using the turbulent political landscape of Brazil as a case study Sarmento asks us to reflect on what the erosion of traditional journalism really means The resulting conclusions will be of value to all those who study or practice journalism around the world in addition to media researchers and activists

Information 2.0 Martin De Saulles,2015-04-30 This textbook provides an overview of the digital information landscape and explains the implications of the technological changes for the information industry from publishers and broadcasters to the information professionals who manage information in all its forms This fully updated second edition includes examples of organizations and individuals who are seizing on the opportunities thrown up by this once in a generation technological shift providing a cutting edge guide to where we are going both as information consumers and in terms of broader societal changes Each chapter explores aspects of the information lifecycle including production distribution storage and consumption and contains case studies chosen to illustrate particular issues and challenges facing the information industry One of the key themes of the book is the way that organizations public and commercial are blurring their traditional lines of responsibility Amazon is moving from simply selling books to offering the hardware and software for reading them Apple still makes computer hardware but also manages one of the world s leading marketplaces for music and software applications Google maintains its position as the most popular internet search engine but has also digitized millions of copies of books from leading academic libraries and

backed the development of the world's most popular computing platform Android. At the heart of these changes are the emergence of cheap computing devices for decoding and presenting digital information and a network which allows the bits and bytes to flow freely for the moment at least from producer to consumer. While the digital revolution is impacting on everyone who works with information, sometimes negatively, the second edition of *Information 2.0* shows that the opportunities outweigh the risks for those who take the time to understand what is going on. Information has never been more abundant and accessible, so those who know how to manage it for the benefit of others in the digital age will be in great demand.

Readership: Students taking courses in library and information science, publishing and communication studies with particular relevance to core modules exploring the information society and digital information. Academics and practitioners who need to get to grips with the new information environment.
