To increase power output an L20B engine has been adopted. This engine is a 4 cylinder overhead cam unit of 1,952 c.c. capacity. The basic mechanical features are essentially the same as the L18 engine used in P610 models. However, to increase capacity, stroke is lengthened by 8 mm to 86 mm and the piston crown modified to retain the 8.5 compression ratio.

The emission control system is an improved version of that used in the L18 engine for the 610 model. Detailed information will be included under the heading "Exhaust Emission Control System".
