Why Art Photography? Lucy Soutter, 2013-02-11 Contemporary art photography is paradoxical Anyone can look at it and form an opinion about what they see yet it represents critical positions that only a small minority of well informed viewers can usually access Why Art Photography provides a lively accessible introduction to the ideas behind today's striking photographic images Exploring key issues such as ambiguity objectivity staging authenticity the digital and photography's expanded field the chapters offer fresh perspectives on existing debates While the main focus is on the present the book traces concepts and visual styles to their origins drawing on carefully selected examples from recognized international photographers Images theories and histories are described in a clear concise manner and key terms are defined along the way This book is ideal for anyone wanting to deepen their understanding of photography as an art form

Viewing Photography in Post-Dictatorship Latin America David Rojinsky, 2022-11-30 This book examines the archival aesthetic of mourning and memory developed by Latin American artists and photographers between 1997-2016 Particular attention is paid to how photographs of the assassinated or disappeared political dissident of the 1970s and 1980s as found in family albums and in official archives were not only reimagined as conduits for private mourning but also became allegories of social trauma and the struggle against socio-political amnesia Memorials art installations photo essays street projections and documentary films are all considered as media for the reframing of these archival images from the era of the Cold War dictatorships in Argentina Chile Guatemala and Uruguay While the turn of the millennium was supposedly marked by the end of history and with the advent of digital technologies by the end of photography these works served to interrupt and hence belie the dominant narrative on both counts Indeed the book's overarching contention is that the viewer's affective identification with distant suffering when engaging these artworks is equally interrupted instead the viewer is invited to apprehend memorial images as emblems of national and international histories of ideological struggle

Image Studies Sunil Manghani, 2013 Image Studies provides an engaging introduction to visual studies analysis and an account of existing and emergent visual culture debates along with chapters on a range of topics including consumer culture and identity photography and digital imaging painting and drawing the moving image the relationship between image and text including reference to text in art comics and animation and scientific imaging Written in an engaging and accessible way the text will also include extracts of existing critical materials Each chapter will include key set readings including short extracts from existing literatures with accompanying study notes and questions The

chapters will also include a range of critical and creative tasks designed to bring the academic study of visual culture into direct contact with practical aspects of visual culture and image making Image Studies is a new text aimed predominantly at undergraduate students in visual culture but which will also be useful for media studies students and arts students more generally Self-Representation in an Expanded Field Ace Lehner, 2021-05-31 Defined as a self image made with a hand held mobile device and shared via social media platforms the selfie has facilitated self imaging becoming a ubiquitous part of globally networked contemporary life Beyond this selfies have facilitated a diversity of image making practices and enabled otherwise representationally marginalized constituencies to insert self representations into visual culture In the Western European and North American art historical context self portraiture has been somewhat rigidly albeit obliquely defined and selfies have facilitated a shift regarding who literally holds the power to self image Like self portraits not all selfies are inherently aesthetically or conceptually rigorous or avant guard But as this project aims to do address via a variety of interdisciplinary approaches selfies have irreversibly impacted visual culture contemporary art and portraiture in particular Selfies propose new modes of self imaging forward emerging aesthetics and challenge established methods they prove that as scholars and image makers it is necessary to adapt and innovate in order to contend with the most current form of self representation to date The essays gathered herein will reveal that in our current moment it is necessary and advantageous to consider the merits and interventions of selfies and self portraiture in an expanded field of self representations We invite authors to take interdisciplinary global perspectives to investigate various sub genres aesthetic practices and lineages in which selfies intervene to enrich the discourse on self representation in the expanded field today **Nonhuman**

Photography Joanna Zylińska, 2024-07-02 A new philosophy of photography that goes beyond humanist concepts to consider imaging practices from which the human is absent as both subject and agent Today in the age of CCTV drones medical body scans and satellite images photography is increasingly decoupled from human agency and human vision In Nonhuman Photography Joanna Zylińska offers a new philosophy of photography going beyond the human centric view to consider imaging practices from which the human is absent Zylińska argues further that even those images produced by humans whether artists or amateurs entail a nonhuman mechanical element that is they involve the execution of technical and cultural algorithms that shape our image making devices as well as our viewing practices At the same time she notes photography is increasingly mobilized to document the precariousness of the human habitat and tasked with helping us imagine a better tomorrow With its conjoined human nonhuman agency and vision Zylińska claims photography functions as both a form of control and a life shaping force Zylińska explores the potential of photography for developing new modes of seeing and imagining and presents images from her own photographic project Active Perceptual Systems She also examines the challenges posed by digitization to established notions of art culture and the media In connecting biological extinction and technical obsolescence and discussing the parallels between photography and fossilization she proposes to understand

photography as a light induced process of fossilization across media and across time scales

Fifty Key Writers on Photography Mark Durden, 2013-02-15 A clear and concise survey of some of the most significant writers on photography who have played a major part in defining and influencing our understanding of the medium It provides a succinct overview of writing on photography from a diverse range of disciplines and perspectives and examines the shifting perception of the medium over the course of its 170 year history Key writers discussed include Roland Barthes Susan Sontag Jacques Derrida Henri Cartier Bresson Geoffrey Batchen Fully cross referenced and in an A Z format this is an accessible and engaging introductory guide

Technology, Design and the Arts - Opportunities and Challenges Rae Earnshaw, Susan Liggett, Peter Excell, Daniel Thalmann, 2020-06-22 This open access book details the relationship between the artist and their created works using tools such as information technology computer environments and interactive devices for a range of information sources and application domains This has produced new kinds of created works which can be viewed explored and interacted with either as an installation or via a virtual environment such as the Internet These processes generate new dimensions of understanding and experience for both the artist and the public s relationships with the works that are produced This has raised a variety of interdisciplinary opportunities and issues and these are examined The symbiotic relationship between artistic works and the cultural context in which they are produced is reviewed Technology can provide continuity by making traditional methods and techniques more efficient and effective It can also provide discontinuity by opening up new perspectives and paradigms This can generate new ideas and produce a greater understanding of artistic processes and how they are implemented in practice Tools have been used from the earliest times to create and modify artistic works For example naturally occurring pigments have been used for cave paintings What has been created provides insight into the cultural context and social environment at the time of creation There is an interplay between the goal of the creator the selection and use of appropriate tools and the materials and representations chosen Technology Design and the Arts Opportunities and Challenges is relevant for artists and technologists and those engaged in interdisciplinary research and development at the boundaries between these disciplines

Activating Democracy Sheryl Oring, 2016-09-02 Driven by a powerful belief in the value of free expression Sheryl Oring has for more than a decade been helping people across the United States voice concerns about public affairs through her I Wish to Say project This book uses that project as the starting point for an exploration of a series of issues of public interest being addressed by artists today It features essays by contributors ranging from art historians and practicing artists to scholars and creators working in literature political science and architecture All the contributors offer a different approach but they share a primary goal of sparking a dialogue not just among makers of art but among viewers readers and the concerned public at large The resulting volume will be an essential resource for politically engaged contemporary artists searching for innovative cross disciplinary ways of making and sharing art

Objects of Vision A. Joan Saab, 2020-11-12 Advances in technology allow us to see the invisible fetal heartbeats

seismic activity cell mutations virtual space Yet in an age when experience is so intensely mediated by visual records the centuries old realization that knowledge gained through sight is inherently fallible takes on troubling new dimensions This book considers the ways in which seeing over time has become the foundation for knowing or at least for what we think we know A Joan Saab examines the scientific and socially constructed aspects of seeing in order to delineate a genealogy of visuality from the Renaissance to the present demonstrating that what we see and how we see it are often historically situated and culturally constructed Through a series of linked case studies that highlight moments of seeming disconnect between seeing and believing hoaxes miracles spirit paintings manipulated photographs and holograms to name just a few she interrogates the relationship between visions and visuality This focus on the strange and the wonderful in understanding changing notions of visions and visual culture is a compelling entry point into the increasingly urgent topic of technologically enhanced representations of reality Accessibly written and thoroughly enlightening Objects of Vision is a concise history of the connections between seeing and knowing that will appeal to students and teachers of visual studies and sensory social and cultural history

The Perception Machine Joanna Zylińska, 2023-11-07 A provocative investigation of the future of photography and human perception in the age of AI We are constantly photographing and being photographed while feeding machine learning databases with our data which in turn is used to generate new images Analyzing the transformation of photography by computation and the transformation of human perception by algorithmically driven images from CGI to AI The Perception Machine investigates what it means for us to live surrounded by image flows and machine eyes In an astute and engaging argument Joanna Zylińska brings together media theory and neuroscience in a Vil m Flusser Paul Virilio remix Her perception machine names a technical universe of images and their infrastructures But it also refers to a sociopolitical condition resulting from today s automation of vision imaging and imagination Written by a theorist practitioner the book incorporates Zylińska s own art projects some of which have been co created with AI The photographs collages films and installations available as part of the book and its companion website provide a different mode of thinking about our technological futures at a local as well as a planetary level Offering provocative concepts such as eco eco punk AUTO FOTO KINO planetary micro vision loser images and sensography the book outlines an existential philosophy of messy media for a time when our practices of imaging and self imaging are being radically redesigned Importantly it also offers a new vision of our future

Photography Theory James Elkins, 2013-10-18 Photography Theory presents forty of the world s most active art historians and theorists including Victor Burgin Joel Snyder Rosalind Krauss Alan Trachtenberg Geoffrey Batchen Carol Squiers Margaret Iversen and Abigail Solomon Godeau in animated debate on the nature of photography Photography has been around for nearly two centuries but we are no closer to understanding what it is For some people a photograph is an optically accurate impression of the world for others it is mainly a way of remembering people and places Some view it as a

sign of bourgeois life a kind of addiction of the middle class whilst others see it as a troublesome interloper that has confused people's ideas of reality and fine art to the point that they have difficulty even defining what a photograph is For some the whole question of finding photography's nature is itself misguided from the beginning This provocative second volume in the Routledge The Art Seminar series presents not one but many answers to the question what makes a photograph a photograph
