

MAKE SENSE OF SHOOTING MODES

The mode you choose affects the amount of control you have over camera settings

Auto mode

If you're a complete novice, this mode is ideal because the camera takes care of all the settings automatically.

Auto Flash Off mode

The same as Auto, but for museums, theatres or indoor sports venues where using a flash might get you thrown out!

Portrait mode

The camera softens skin tones and uses a wide aperture to throw the background out of focus.

Landscape mode

Designed for vivid landscape shots taken in daylight. The built-in flash is switched off and you might need a tripod in poor light.

Child mode

In this mode, the camera makes backgrounds and clothing colourful but keeps skin tones soft and natural looking.

Sports mode

The flash is switched off and the camera uses faster shutter speeds to help freeze fast-moving subjects.

Close-up mode

This favours a smaller aperture to improve depth of field. Consider using a tripod when there's a risk of camera-shake.

Night Portrait mode

The flash fires to light your subject, but the camera uses a slower shutter speed to capture the background lighting too.

Manual mode

This is designed for experts. You choose the shutter speed and aperture yourself, though the camera still suggests settings.

Aperture Priority

Use this if you want to choose the aperture yourself. The camera will set the shutter speed automatically for correct exposure.

Shutter Priority

Use this if you want to choose the shutter speed yourself. The camera will set the aperture automatically so that the exposure is correct.

Program AE mode

Ideal for general use, or when there's little time to think. The camera sets the shutter speed and aperture but you get to control other settings.

GUIDE

A special feature on the D3000 that shows you what to do as you're taking pictures. It's a great way for beginners to learn about photography.

Photographer's Guide to the Nikon Coolpix P500 Alexander S. White, 2011-08 This book is a complete guide to the operation and features of the Nikon Coolpix P500. It is a follow-up to the author's earlier guides to advanced compact digital cameras including most recently the Panasonic Lumix LX5 and the Canon PowerShot S95. The new book like the earlier ones explains all operations, features, menus, and controls of the Coolpix P500 camera in clear language providing guidance not only about how to accomplish things with the camera but when and why to use certain features. The book does not assume any specialized knowledge by the reader but adopts a patient and helpful tone in explaining topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (High Dynamic Range) photography, and macro photography. The book also includes a detailed discussion of techniques for using the camera's phenomenal zoom lens with a maximum focal length of 810mm to full advantage. The book's more than 200 photographs, almost all in full color, provide illustrations of the camera's controls and menus and also include examples of the various types of photographs that can be taken using the many creative settings of the camera including the Optimize Image settings which let the photographer alter the color processing of images. The Scene modes with settings that are optimized for various subjects including landscapes, portraits, and action shots, and the camera's particularly strong array of features for continuous shooting and interval shooting. In addition, the book goes beyond the realm of everyday photography and provides introductions to more advanced topics such as infrared photography, street photography, and creating 3D (three-dimensional) images that can

be viewed with conventional red and blue 3D glasses The book also includes a full discussion of the video recording abilities of the Coolpix P500 which can record high definition HD video with stereo sound and which has special settings for recording short clips of high speed video at rates up to 8 times normal speed In three appendices the book provides information about accessories available for the camera sets forth a list of useful web sites and other resources for further information and includes a section with helpful quick tips that give particular insights into how to take advantage of the camera s features in the most efficient ways possible

From Beginner to Advanced Level* Steven Walryn, 2023-03-07

In late 2020, Nikon unveiled the Z6 II, a mirrorless full-frame camera. It replaces the beloved Nikon Z6 and builds upon its predecessor in every way imaginable: speed, functionality, and user-friendliness. The Z6 II boasts a better focusing system with 273 focus points and a 24.5 megapixel BSI CMOS sensor that can shoot 4K video at up to 30 frames per second. It also includes two EXPEED 6 image processors. It supports both SD and XQD cards in its twin card slots and it also includes Wi-Fi and Bluetooth among other things. If you're a photographer searching for a versatile camera that can shoot both stills and videos, the Nikon Z6 II is an excellent option.

Design Upgrades The Nikon Z6 II is noticeably more compact than its predecessor and it sports a new style that is both sleeker and more up-to-date. With a magnesium frame and carbon fiber reinforcements, it's surprisingly lightweight for how sturdy it is. The camera's layout keeps controls within easy reach, making it a breeze to operate. For instance, the camera's menus may be accessed not by buttons on the rear but rather via an LCD on the top of the device and a corresponding eyelet next to each lens attachment. What you will be getting is Nikon's newest addition to their mirrorless camera series: the Z6 II seeks to build upon the success of the original Nikon Z6. The Z6 II is going to be well-liked among photographers with its upgraded autofocus system, dual EXPEED 6 CPU, and capacity to capture 4K video. In addition to the increased low-light capabilities and longer battery life, the Z6 II's other notable features include two memory card slots for more storage options. It has some of the most advanced capabilities of any camera in its price range. I am curious as to what features this new powerhouse from Nikon will provide. With a 45.7 megapixel full-frame sensor, robust built-in Wi-Fi, and a more simplified menu system, the Z6 II makes Nikon's cutting-edge photographic technology accessible to a wider audience. The camera has a 1/32000-second shutter speed and a refined 51-point autofocus system, making it great for capturing fast-moving scenes. Whether you're looking for more control while filming fast-paced action or capturing slower action at a distance, the Z6 II is the first Nikon camera to provide 4K UHD video recording at 30 fps, in addition to full HD 1080p video at 60 fps. Nikon's new Z6 II will be available in the company's distinctive black color scheme and is compatible with all of Nikon's existing lenses, including NIKKOR glass.
