Jeffrey Meldrum,Charles E. Hilton,2011-06-27 The inspiration for this volume of contributed papers stemmed from conversations

between the editors in front of Chuck Hilton's poster on the determinants of hominid walking speed presented at the 1998 meetings of the American Association of Physical Anthropologists (AAPA). Earlier at those meetings Jeff Meldrum with Roshna Wunderlich had presented an alternate interpretation of the Laetoli footprints based on evidence of midfoot flexibility. As the discussion ensued we found convergence on a number of ideas about the nature of the evolution of modern human walking. From the continuation of that dialogue grew the proposal for a symposium which we called *From Biped to Strider: the Emergence of Modern Human Walking*. The symposium was held as a session of the 69th annual meeting of the AAPA held in San Antonio, Texas, in 2000. It seemed to us that the study of human bipedalism had become overshadowed by the often polarized debates over whether australopithecines were wholly terrestrial in habit or retained a significant degree of arboreality.
