The Garden Party

by Katherine Mansfield

And after all the weather was ideal. They could not have had a more perfect day for a garden-party if they had ordered it. Windless, warm, the sky without a cloud. Only the blue was veiled with a haze of light gold, as it is sometimes in early summer. The gardener had been up since dawn, mowing the lawns and sweeping them, until the grass and the dark flat rosettes where the daisy plants had been seemed to shine. As for the roses, you could not help feeling they understood that roses are the only flowers that impress people at garden-parties; the only flowers that everybody is certain of knowing. Hundreds, yes, literally hundreds, had come out in a single night; the green bushes bowed down as though they had been visited by archangels.

Breakfast was not yet over before the men came to put up the marquee.

"Where do you want the marquee put, mother?"

"My dear child, it's no use asking me. I'm determined to leave everything to you children this year. Forget I am your mother. Treat me as an honoured guest."

But Meg could not possibly go and supervise the men. She had washed her hair before breakfast, and she sat drinking her coffee in a green turban, with a dark wet curl stamped on each cheek. Jose, the butterfly, always came down in a silk petticoat and a kimono jacket.

"You'll have to go, Laura; you're the artistic one."

Away Laura flew, still holding her piece of bread-and-butter. It's so delicious to have an excuse for eating out of doors, and besides, she loved having to arrange things; she always felt she could do it so much better than anybody else.

Age Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today's young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions
