Why Did People Burn Books In Fahrenheit 451:

The Wolf Tamers: How They Made the Strong Weak David Sinclair, 2023-02-21 In the war of the wolves and the sheep what if the sheep started winning Are human wolves a keystone species of the human race If they were hunted to extinction leaving no one to winnow the mediocre mob what would happen to humanity The narrator in the movie Idiocracy was on point when he said Evolution does not necessarily reward intelligence With no natural predators to thin the herd it began to simply reward those who reproduced the most and left the intelligent to become an endangered species The same is true of strength Without the strong the weak will reproduce more and more and eventually there will only be weakness mediocrity an inability an impossibility to achieve anything great and glorious The strangest war is being fought It s a war to destroy human intelligence and human strength This war says that wolves must be exterminated or made into non wolves by taming them And then they can become pets You know just like dogs You put a collar on them You put a leash on them You take them for walks You tickle their tummy You make them perform tricks You make them roll over and play dead They are wholly dependent on you They have separation anxiety when you re not there They have to make the intelligent stupid They have to make the strong weak But they don t know what they re doing The task is not to tame wolves It s to make them smarter and stronger It s to sublimate them Without the wolves there is only decadence and degeneration Without the wolves to control mediocrity mediocrity grows exponentially Why did the Roman Empire fall It was because all the Roman wolves had gone Only mediocrities were left They could do nothing to hold back the barbarian tide Civilizations always end when the wolves vanish New cultures begin when new wolves start a new lupine era full of strength and vigor Are you a lone wolf Are you one of the wolf pack Or are you part of the gang trying to tame all wolves Do you want to see the empire fall When it no longer has any strength left when mediocrities are in charge of everything then the end is certain As Wilfred Owen said What passing bells for these who die as cattle Was it for this the clay grew tall

The Shadow of the Precursor Nena Bierbaum, 2011-10-18 A shadow in its most literal sense is the projection of a silhouette against a surface and the obstruction of direct light from hitting that surface For writers and artists the shadows cast by their precursors can be either a welcome influence one consciously evoked in textual production via homage or

bricolage or can manifest as an intrusive haunting prohibitive presence one which threatens to engulf the successor Many writers and artists are affected by an anxious and ambiguous relationship with their precursors while others are energised by this relationship The role that intertextuality plays in creative production invites interrogation and this publication explores a range of conscious and unconscious influences informing relations between texts and contexts between predecessors and successors The chapters revolve around intertextual influence ranging from conscious imitation and intentional allusion to Julia Kristeva's idea of intertextuality Do all texts contain references to and even quotations from other texts Do such references help shape how we read This multidisciplinary work includes chapters on the long shadows cast by Shakespeare Dante Scott Virgil and Ovid the shadows of colonial precursors on postcolonial successors the shadows cast over Kipling and Murdoch and chapters on other writers dramatists and filmmakers and their relationships with precursor figures With its focus on intertextual relationships this book contributes to the thriving fields of adaptation studies and studies of intertextuality
