Why Math Must Replace Science Mike Hockney:

Why Math Must Replace Science Mike Hockney, 2014-11-03 The greatest catastrophe in intellectual history was to regard physics as real and mathematics as an unreal abstraction In fact mathematics is noumenal true reality and physics is phenomenal illusory reality Mathematics tells you what things are in themselves and physics tells you how they appear to us Mathematics is the perfect ground of existence defined by the God Equation It s the source of causation determinism and objective reality all of the things now formally denied by physics which claims that observable reality is indeterministically born of unreal potentiality wavefunctions It s time to replace the scientific method with the mathematical method It s time to recognize that true reality is intelligible not sensible noumenal not phenomenal unobservable not observable metaphysical not physical hidden not manifest rationalist not empiricist necessary not contingent Don t follow the crowd Think for yourself

Gödel Versus Wittgenstein Mike Hockney, 2016 Perhaps nothing has been more misinterpreted than G del s incompleteness theorems Stephen Hawking adopting the popular misconception said Thus mathematics is either inconsistent or incomplete The smart money is on incomplete If mathematics is tautology as Wittgenstein said mathematics cannot be inconsistent and or incomplete and so G del s work cannot be about mathematics If mathematics is not tautological mathematics is mired in inconsistency and or incompleteness just as Stephen Hawking said hence is unreliable If mathematics is non ontological it cannot say anything about reality If mathematics is ontological it s the only thing that can say anything true about reality There can t be a world where math is a bit true and a bit false Either the world is wholly mathematical in which case math and not science is how we must study the world or the world isn t mathematical at all in which case it s absurd for science to use math

Ontological Mathematics: How to Create the Universe Mike Hockney, This book explains how the entire universe can be created using just two ingredients nothing at all and the Principle of Sufficient Reason PSR Why would you need anything else Nothing else could do the job Existence believe it or not is just dimensionless mathematical points moving according to the PSR Come and find out how the PSR accomplishes it

The War of the Ghosts and Machines Mike Hockney, 2015-09 Are you a ghost or a machine You don t need to be a superstitious believer to support the side of the ghosts Machine people reduce everything to lifeless mindless purposeless atoms of matter the ultimate little machines For ghost people reality reduces to dimensionless mathematical singularities which are none other than the hyperrational monadic souls posited by Pythagoras and Leibniz Ghost people subscribe to atoms minds with atomic number zero i e minds souls are made of massless dimensionless photons Machine people start with hydrogen atoms with atomic number one All ghost entities are associated with zero and infinity All machine people deny the existence of zero and infinity Mathematically these are the two numbers where the ghosts and the machines collide head on This book is all about demonstrating that there are indeed ghosts in the machines

Science's War On Reason Mike Hockney, 2016-01-02 People can t reason They don t even know what reason is Reason is almost always harnessed to something that has nothing to do

with reason Believers in mainstream religion are feeling types who reason with their emotions or with their mystical intuitions Scientists are sensing types They subordinate their reason to their senses All scientists are empiricists and are opposed to rationalism i e the existence of a rational order of reality completely removed from the human senses which can only be apprehended rationally logically mathematically and via intellectual intuition Scientists try to don the cloak of rationalism even though they are explicitly opposed to mathematical rationalism which addresses a more fundamental noumenal reality than the one amenable to phenomenal science

Psychophysics Mike Hockney,2015-09 One hundred percent of scientists think that Einstein s special theory of relativity is correct One hundred percent of scientists are wrong Isn t that astounding Why is it so hard for scientists to see the blatant errors in Einstein s logic The central reason for the failure of Einstein s theory as an account of ultimate existence is that like everything else in science it denies the real existence of mind Once mind is admitted to physics Einstein s fallacies become obvious To refute both Einstein only one thing is required to place an eternal non sensory mathematical Singularity at the centre of the spacetime universe This Singularity is a Fourier frequency domain but is functionally equivalent to a Cosmic Mind Because it s an immaterial dimensionless entity outside space and time the Singularity is undetectable by any scientific experiment yet its existence automatically disproves all claims of scientific materialism regarding the fundamental nature of reality

The Forbidden History of Science Mike Hockney,2015-07-31 The problem is not to find the answer it s to face the answer Terence McKenna At school you are taught science You are not taught the history of science so you have no idea how science came to be the institution it now is You are never taught the secret history of science whereby scientific idealism based on the mind could have become the orthodoxy rather than scientific materialism based on the body In this book we will show you how easily science could have taken an entirely different route from the one it did take The heroes of this tale are Immanuel Kant in his younger Leibnizian years and the Jesuit Roger Boscovich Their system embraced mind in its own right i e mind considered as something that does not owe its existence to matter Read for yourself the astounding rival history of science You will soon discover why it s so terrified of drawing any attention to the secret history of science the forbidden history

The Science of Monads Mike Hockney,2015-07-31 Scientific materialism isn t the only type of science Leibniz the great German genius was a champion of scientific idealism The atoms in his system weren t physical but mental and he named them monads A present day Leibniz might say All things are made from mental atoms which are simple mathematical substances from which all compounds are mathematically derived via the laws of ontological mathematics Monads are expressed through constant motion and that mental motion is what we call thinking Pure thinking takes place in an immaterial mathematical frequency domain outside space and time By virtue of Fourier mathematics frequency functions can be represented in a spacetime domain and this domain is what is known as the physical world of matter It is just a certain mode of mental functionality There is no such thing as scientific matter There is only mind A mind is a monad and monads are all there are Everything is

an expression of monadic mental mathematics **The Illumination Project** Mike Hockney, 2024-04-12 They came seeking Illumination Did they find it Well how would they know What makes you think you re enlightened Maybe you re one of those false awakeners How do you know that your enlightenment isn t illusory What criteria are you using to determine what enlightenment is Why those criteria Have you ever even thought about it And if you haven t how can you possibly be enlightened Enlightenment isn t ignorance It s not about willfully ignoring the facts It s not about turning your back on reason and logic It s not about severe cognitive deficits It s not about annihilating your mind nirvana It s not about unconditional love It s not about your feelings at all It s not about super duper mystical intuition It s not about perfecting your senses It s about none of those Project Illumination is about showing what Illumination is really all about Come inside and expose yourself to the light of reason the only thing that can truly Illuminate you Are you ready to receive the light Let s light this thing up **Transcendental Mathematics** Mike Hockney, 2015-06-16 Science is about the mundane visible world Religion is about the transcendent invisible world Atheists believe that science is the only way to explain the world Agnostics think it s the best way But is science actually a system of explanation at all or merely a good problem solving tool and method that achieves practical success in the observable world Isn t science like God in need of an explanation What is its ontological and epistemological basis What limitations does it have How does it define Truth Immanuel Kant via his philosophy of transcendental idealism attempted to explain science within a philosophical and even religious context This attempt ultimately failed but the project itself need not be abandoned This book shows via a detailed investigation of Kant s philosophy that the only way to make sense of science is via transcendental mathematics *Black Holes Are Souls* Mike Hockney, 2015-03-31 Any theory any theory at all that begins with false assumptions will produce false results Therefore the most fundamental task of all is to examine and get right the assumptions that underlie a theory How do science s fundamental assumptions stand up to scrutiny Science falls apart at a particular aspect of existence that can be defined exactly at singularities The whole logic of science collapses when singularities are encountered This is fantastically problematic for science given that black holes are centred on singularities photons are singularities and the whole of the Big Bang Universe came from a Singularity What ontologically are singularities Descartes gave us the answer hundreds of years ago Singularities are minds and from that single fact science is turned on its head Mind does not come from matter matter comes from mind **Richard Dawkins: The Pope of Unreason** Mike Hockney, 2014-12-19 A book attacking the ideology of Richard Dawkins is invariably assumed to be a defence of religious faith Nothing could be further from the truth in this case This book equates faith with insanity Instead it argues that we live in the hyperrational reality of ontological mathematics We attack the scientific dogma of Dawkins and his fellow travellers for being incompatible with ontological mathematics and in fact constituting a quasi religious hence mad faith in empiricism materialism randomness and meaninglessness nihilism all of which are refuted by ontological mathematics which reflects the principle of sufficient reason Are you rational enough for the

truth Are you intelligent enough to be an ontological mathematician Many are called few are chosen **The Holographic Soul** Mike Hockney, 2016-01-02 Where is your mind located How does it interact with your body When your body dies does your mind die too or does it have an afterlife That s the mystery of existence If humanity cannot answer these questions once and for all then it has no understanding of reality Holography is what allows scientific materialism to be replaced by mathematical idealism Holography allows the soul rather than matter to be considered the source of reality Over 300 years ago Leibniz with his Monadology adopted a holographic model of reality whereby dimensionless monads created the illusion of the dimensional material world The answer to existence has always been right in front of humanity in the shape of mathematics The spacetime universe of matter is nothing but an ontological hologram that comes inbuilt with mathematical forcefields that lend it the illusion of being solid It s all in the math Everything starts with unextended minds dimensionless Fourier singularities mathematical souls Causation and the Principle of Sufficient Reason Mike Hockney, 2015-02-09 The cleverest people in the world are those most capable of making the least expected connections between apparently disparate things This book explains how light life mind souls causation motion energy ontological mathematics and ontological reason are all synonymous Are you one of the rare few capable of seeing the light Can you see the hidden mathematical order beneath the Grand Illusion presented to our senses Only those on the verge of Enlightenment have any hope of understanding ontological mathematics the science of the soul the science of the unseen light of the Universal Mind It s all in the math If then you do not make yourself equal to God you cannot apprehend God for like is known by like Hermes Trismegistus **Kill God! The Hunt for the Cosmic War Criminal** Ranty McRanterson, 2018-02-22 Good old Freddie Nietzsche announced that God is dead Most of the world obviously didn t get the memo God seems to be alive and kicking worse than ever He s in our face He s out he s loud and he s proud More people believe in God now than at any time in human history This guy s on a roll He s a lot more successful than Nietzsche that s for sure Freddie said Success has always been the greatest liar Sore loser It s not enough to proclaim God dead You actually have to go and perform the deed You have to get your hands dirty If anyone needs dealing with it s God God is a monster and a mass murderer He s a war criminal He s quite simply humanity s deadliest enemy Just read the Torah Bible or Koran You must strike down the tyrant as Brutus and Cassius did to Caesar It s time for the HyperHumans to slay the gods and become gods themselves *Organic Intelligence (O.I.)* Mike Hockney, George Orwell author of 1984 worked for the British Broadcasting Corporation for two years Reflecting on his experience at the BBC Orwell said Its atmosphere is something halfway between a girls school and a lunatic asylum and all we are doing at present is useless or slightly worse than useless Many decades later the BBC is exactly the same How should we describe the places developing new A I Halfway between Comic Con and a lunatic asylum People are transfixed by Artificial Intelligence A I They have forgotten the power of Organic Intelligence O I Humans became masters of the world and landed men on the moon because of O I It was O I that thought up A I And even greater wonders

are possible Each of us has an unconscious mind with O I potentialities barely guessed at The unconscious is the supreme terra incognita What lies at the end of that land is the domain of gods reachable by Bifr st the sublime rainbow bridge Discover the Creative Mind the supra liminal mind the subliminal mind the subjective mind the bicameral mind Did the gods once speak directly to us Find out about synaptic pruning the triune brain the evolutionary theories of Lamarck and Wallace Are their theories superior to Darwinism The refrigerator mother the malignant narcissist the lack of secure base the mother complex autism how does it all fit together Ant trails stem cells neural nets What s it all about Is the local body controlled by a non local mind What is the transmission theory of consciousness Is the brain a transceiver or a bi directional transduction device Is it a filter for cosmic consciousness Are telepathy and telekinesis possible Follow the pheromone trail of the ants to Golgonooza the City of the Imagination where the Magic Mirror is kept Mirror mirror on the wall who is the smartest of all Can we optimize the mind Is the optimized mind none other than God Who will pay the Ferryman Will you always be trapped on the near side of the river You ll never make it to the Other Side Come inside and discover how far from organic intelligence A I truly is Discover how amazing your own mind is both consciously and unconsciously Orwell said But if thought corrupts language language can also corrupt thought If thought optimizes language language can also optimize thought Does God think in perfect language Is that what perfect O I is **Ontics** Mike Hockney, The New Way Is there a better way of doing physics that retains the best of current physics while going far beyond it Physics is currently based on the claim and claim it most certainly is that physics deals with something real let s call that real thing matter though there is no ontological definition of matter and it can be somehow analyzed by an unreal manmade abstraction namely mathematics But what happens if you accept a different assertion one that makes mathematics not an abstraction but a concrete reality an ontology As soon as you make mathematics real you cast doubt on the reality of matter But do we need to make a definitive choice Why not operate both systems one based on mathematics as real and one based on matter as real and then try to find a way to synthesize these different views Kant with his transcendental idealism sought to reconcile empiricism and rationalism Ontics seeks to reconcile the empiricism of materialism and the rationalism of mathematics Ontics via ontological mathematics gives mind a reality that is entirely absent in materialism So with science on the one hand and ontological mathematics on the other hand body and soul matter and mind can start to be brought together into a single system Isn t explaining mind science s biggest challenge Ontological mathematics provides that exact capacity Isn t it time for the ultimate paradigm shift Isn t it time for an intellectual revolution for a true age of reason The Omega Point Mike Hockney, 2013-09-30 History s biggest lie is that there s one God and he created the universe out of nothing Nothing has done more damage to the human psyche than monotheism the doctrine of an all powerful Spy God the divine peeping Tom who sentences to hell anyone who doesn t slavishly obey him In fact the universe is a mathematical God factory and creates infinite Gods over eons of time The universe via dialectical ontological mathematics is converging on the perfect answer to

everything the condition known as the Absolute or the Omega Point The universe travels mathematically from Alpha to Omega from perfect potential to perfect actualization The ancient secret society of the Illuminati has waged a war against Abrahamic monotheism and promoted the doctrine of becoming God Mathematics is the Philosopher s Stone that can transmute base metal ordinary humans into gold Gods You too can complete your cosmic journey across countless reincarnations Are you ready to become an Omega Human **Notices of the American Mathematical Society** American Mathematical Society,1987 *Reference Books Bulletin* ,1997
