*Economic Adjustment in Contemporary
France and Germany*

MARK I. VAIL

Recasting Welfare Capitalism

Vivien A. Schmidt, Mark Thatcher

Recasting Welfare Capitalism :

Recasting Welfare Capitalism Mark Vail, In Recasting Welfare Capitalism Mark Vail employs a sophisticated and original theoretical approach to compare welfare states and political economic adjustment in Germany and France He examines how and why institutional change takes place and what factors characterize economic evolution when moving from times of prosperity to more austere periods and back again Covering the 1970s to the present Vail analyzes social and economic reforms including labor policy social insurance and anti poverty programs He focuses on the tactics and actions of key political players and demolishes the stagnation argument that suggests that France and Germany have largely frozen political economies incapable of reform Vail finds that these respective evolutions involve interrelated changes in social and economic policies and are characterized by political relationships that are continuously renegotiated often in unpredictable ways In the process he presents a compelling reconceptualization of change in both the welfare state and the broader political economy during an age of globalization

Beyond the Frozen Welfare State Mark Ian Vail, 2005 **Liberalism in Illiberal States** Mark I. Vail, 2018 After the end of the Cold War liberalism emerged as the world's dominant political economic ideology and economic liberalism seemed to have achieved global hegemony In Liberalism in Illiberal States Mark Vail acknowledges the dominance of economic liberalism but argues that its implementation in specific countries is always unique and dependent upon powerful historical factors He focuses on France Germany and Italy countries that many scholars do not view as liberal at all and contends they have in fact developed distinct forms of national liberalism of which their postwar models of capitalism were merely one manifestation Vail argues that these states political economies have been shaped by centuries old liberal traditions which have continued to inform national alternatives to transnational neoliberalism in the contemporary era He presents case studies that show how nationally specific interpretations of liberalism are flexible and responsive to local realities especially in times of economic uncertainty By demonstrating how variegated the practice of economic liberalism actually is Liberalism in Illiberal States will reshape our understanding of liberal political economy in the contemporary world

National Identity and the Varieties of Capitalism John L. Campbell, John A. Hall, Ove Kaj Pedersen, 2006 Denmark has out performed most other advanced capitalist countries since the mid 1980s Contributors to National Identity and the Varieties of Capitalism draw from the literature on capitalism and small states and corporatism to explore why this is the case They find that Danish political and economic institutions facilitate bargaining and consensus building in ways that have enabled the state businesses and labour unions to adapt to the challenges of globalization Moreover by virtue of its small size homogeneous population and response to a variety of international challenges both economic and geopolitical Denmark has developed a strong national identity that further bolsters consensus building The result has been an adaptable and flourishing national political economy

Yearning to Labor John P. Murphy, 2017 In the first decade of the twenty first century France underwent a particularly turbulent period during which urban riots in 2005

and labor protests in 2006 galvanized people across the country and brought the question of youth unemployment among its poorer multiethnic outer cities into the national spotlight Drawing on more than a year of ethnographic field research in the housing projects of the French city of Limoges *Yearning to Labor* chronicles the everyday struggles of a group of young people as they confront unemployment at more than triple the national rate and the crushing despair it engenders Against the background of this ethnographic context John P Murphy illuminates how the global spread of neoliberal ideologies and practices is experienced firsthand by contemporary urban youths in the process of constructing their identities An original investigation of the social ties that produce this community *Yearning to Labor* explores the ways these young men and women respond to the challenges of economic liberalization deindustrialization and social exclusion At its heart *Yearning to Labor* asks if the French republican model of social integration assimilation and equality before the law remains viable in a context marked by severe economic exclusion in communities of ethnic and religious diversity *Yearning to Labor* is both an ethnographic account of a certain group of French youths as they navigate a suffocating job market and an analysis of the mechanisms underlying the shifting economic inequalities at the beginning of the twenty first century [The Oxford Handbook of Historical Institutionalism](#) Karl Orfeo Fioretos,Tulia Gabriela Falletti,Adam D. Sheingate,2016 This volume offers an authoritative and accessible state of the art analysis of the historical institutionalism research tradition in Political Science

Routledge Handbook of European Politics José Magone,2014-12-17 Since the Treaty of the European Union was ratified in 1993 the European Union has become an important factor in an ever increasing number of regimes of pooled sovereignty This Handbook seeks to present a valuable guide to this new and unique system in the twenty first century allowing readers to obtain a better understanding of the emerging multilevel European governance system that links national polities to Europe and the global community Adopting a pan European approach this Handbook brings together the work of leading international academics to cover a wide range of topics such as the historical and theoretical background the political systems and institutions of both the EU and its individual member nations political parties and party systems political elites civil society and social movements in European politics the political economy of Europe public administration and policy making external policies of the EU This is an invaluable and comprehensive resource for students scholars researchers and practitioners of the European Union European politics and comparative politics *Comparing European Workers* David Brady,2011-06-22 Focuses on the politics economics sociology and history of work and workers in Europe This title places the labor markets workplaces jobs and workers of Europe in comparative perspective and compares contemporary patterns and the history of European workers with other models of work worldwide [The State After Statism](#) Jonah D. Levy,2006-10-01 This book assesses the changing nature of state intervention in the economies of the affluent democracies Against a widespread understanding that contemporary developments such as globalization and new technologies are pressing for a rollback of state regulation in the economy the book shows that these same forces are also creating new

demands and opportunities for state intervention Thus state activism has shifted rather than simply eroded State authorities have shifted from a market steering orientation to a market supporting one Chief among the new state missions are repairing the main varieties of capitalism liberal corporatist and statist making labor markets and systems of social protection more employment friendly recasting regulatory frameworks to permit countries to cross major economic and technological divides and expanding market competition at home and abroad Because the changes from market steering to market support are so controversial and far reaching state officials often find themselves making choices that produce clear winners and losers Such choices require a capacity to act unilaterally and decisively even in the face of substantial societal opposition As a result state activism autonomy and occasionally imposition remain essential for meeting the challenges of today's globalizing economy

Constructing the EU's Political Identity Sabine Saurugger, Mark Thatcher, 2022-10-23 This book examines the construction of the EU's political identity or identities variations in its strength and the nature of its content Drawing on studies both on European nation state formation and on the EU's identity the chapters take a top down approach and analyse how EU institutions in different major policy domains have themselves sought to create political identity through policy making The authors define the construction of EU political identity and set out empirically applicable indicators to assess political identity in policy making They analyse the construction of identity through a process oriented approach that explicitly includes contestation and the existence of rival political identities Comparing across policy domains the contributions suggest that the ability of EU institutions to construct an EU political identity has been limited not only by existing national identities but also by the coexistence of rival EU political identities within policy domains Hence it has been difficult for EU institutions to establish a strong identity with identity being strongest where there are clear external alternatives and limited rival identities within the EU

Contested Liberalization Jonah D. Levy, 2023-04-13 Economic liberalization has been contested and defeated in France to an unparalleled extent in comparison to other leading political economies in Western Europe Levy offers a historical explanation centered on the legacies of France's postwar statist or dirigiste economic model Although this model was dismantled decades ago its policy party political and institutional legacies continue to fuel the contestation of liberalizing reforms today Contested Liberalization offers a comprehensive analysis of French economic and social policy since the 1980s including the Macron administration It also traces the implications of the French case for contestation in East Asia and Latin America Levy concludes by identifying ways that French liberalizers could diminish contestation notably by adopting a more inclusive process and more equitable allocation of the costs and benefits of liberalizing reform This book will interest scholars and students of political economy and comparative politics especially those working on economic liberalization French politics and the welfare state

Resilient Liberalism in Europe's Political Economy Vivien A. Schmidt, Mark Thatcher, 2013-08-29 This book explains why neoliberal economic ideas have not just survived but thrived since the 1980s taking Europe from boom to bust

The Age of Dualization Patrick

Emmenegger, 2012-01-17 Poverty increased inequality and social exclusion are back on the political agenda in Western Europe not only as a consequence of the Great Recession of 2008 but also because of a seemingly structural trend towards increased inequality in advanced industrial societies that has persisted since the 1970s How can we explain this increase in inequalities Policies in labor markets social policy and political representation are strongly linked in the creation widening and deepening of insider outsider divides a process known as dualization While it is certainly not the only driver of increasing inequality the encompassing nature of its development across multiple domains makes dualization one of the most important current trends affecting developed societies However the extent and forms of dualization vary greatly across countries The comparative perspective of this book provides insights into why Nordic countries witness lower levels of insider outsider divides whereas in continental liberal and southern welfare states they are more likely to constitute a core characteristic of the political economy Most importantly the comparisons presented in this book point to the crucial importance of politics and political choice in driving and shaping the social outcomes of deindustrialization While increased structural labor market divides can be found across all countries governments have a strong responsibility in shaping the distributive consequences of these labor market changes Insider outsider divides are not a straightforward consequence of deindustrialization but rather the result of political choice A landmark publication this volume is geared for faculty and graduate students of economics political science social policy and sociology as well as policymakers concerned with increasing inequality in a period of deep economic and social crisis

Comparative Political Economy Georg Menz, 2017 A genealogy of the field from Adam Smith to the mid twentieth century Contemporary CPE the turn towards comparative capitalism and the relationship with IPE Varieties of capitalism and the next steps beyond Labour markets and their regulation industrial relations and the organization of business and labour Models of finance and corporate governance and their implications The political economy of debt Welfare state models taming the market The state as an actor not a neutral umpire Conclusion future directions for comparative political economy
