Rethinking Class Size: The complex story of impact on teaching and learning Peter Blatchford, Anthony Russell , 2020-11-12 The debate over whether class size matters for teaching and learning is one of the most enduring and aggressive in education research Teachers often insist that small classes benefit their work But many experts argue that evidence from research shows class size has little impact on pupil outcomes so does not matter and this dominant view has informed policymaking internationally Here the lead researchers on the world s biggest study into class size effects present a counter argument Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers experience and conclude that class size matters very much indeed Drawing on 20 years of systematic classroom observations surveys of practitioners detailed case studies and extensive reviews of research Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided While class size may have no direct effect on pupil outcomes it has they say significant force through interconnections with classroom processes In describing these connections the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere It impacts on

teaching grouping practices and classroom management the quality of peer relations tasks given to pupils and on the time teachers have for marking assessments and understanding the strengths and challenges for individual pupils From their analysis the authors develop a new social pedagogical model of how class size influences work and identify policy conclusions and implications for teachers and schools

Bilateral support to primary education Great Britain: National Audit Office,2010-06-18 The Department for International Development has successfully supported developing countries in

progress against goals of universal enrolment in primary education and improved educational prospects for girls DFID's 22 priority countries have made significant progress towards universal enrolment from typically 50 per cent of children or lower in the mid 1990s to 70 per cent to 90 per cent now But pupil drop out is high typical drop out rates are 10 per cent to 15 per cent in year one and completion of primary education is low ranging from 57 per cent of children in Nepal to 17 per cent in Malawi Because pupil and teacher attendance is poor there are insufficient teaching hours And although pupil attainment has been poorly measured the information that is available shows low levels of literacy and numeracy since 2001 DFID along with other donors and recipient governments has focused on enrolment more than the quality of education It has started to redress this imbalance but needs to focus more on key factors like teacher and pupil attendance quality and attainment in its interventions Typically salaries mostly those of teachers consume 90 per cent of education budgets in developing countries yet pay is not routinely monitored Wage bills have reached levels which limit the affordability of educational expansion in DFID priority countries There are other opportunities to work with governments to help raise cost effectiveness non formal education initiatives designed to reach remote or migrant communities have features which could be applied successfully in formal schools
