**Proceedings of the 8th International Conference on Computational Science and Technology** Rayner Alfred, Yuto Lim, 2022-03-25 This book gathers the proceedings of the Seventh International Conference on Computational Science and Technology ICCST 2021 held in Labuan Malaysia on 28-29 August 2021. The respective contributions offer practitioners and researchers a range of new computational techniques and solutions, identify emerging issues and outline future research directions while also showing them how to apply the latest large-scale high-performance computational methods. *Events and Sustainability* Kirsten Holmes, Michael Hughes, Judith Mair, Jack Carlsen, 2015-03-24 Increasing concerns over climate and environmental change, the global economic and financial crisis, and impacts on host communities, audiences, participants, and destinations has reinforced the need for more sustainable approaches to events. Sustainability now features as part of the bid process for many mega events such as the Olympic Games as well as significant regional and local events where the event organisers are required by funding bodies and governments to generate broader outcomes for the locality. This book is the first to offer students a comprehensive introduction to the full range of issues and topics relevant to event sustainability, including impacts, operating and policy environments, stimulating urban regeneration and creating lasting legacies, as well as practical knowledge on how to achieve a sustainable event. Taking a holistic approach drawing on multidisciplinary theory, it offers insight into the economic, socio-cultural, and environmental impacts and how these can be adapted or mitigated. Theory and practice are linked through integrated case studies based on a wide range of event types from mega events to community festivals to show impacts, best practice, and how better sustainable practice can be achieved in the future. Learning objectives, discussion questions, and further reading suggestions are included to aid understanding and further knowledge. Additional resources for lecturers and students, including power point slides, video, and web links are available online. *Events and Sustainability* is essential reading for all events management students and future managers. **Control Applications in Modern Power Systems** Jitendra Kumar, Manoj Tripathy, Premalata Jena, 2022-05-27 The volume contains peer-reviewed proceedings of EPREC 2021 with a focus on control applications in the modern power system. Gibson, Laurel A. Rachmeler, Stephen M. White, 2017-07-11 Magnetism defines the complex and dynamic solar corona. It determines the magnetic loop structure that dominates images of the corona and stores the energy necessary to drive coronal eruptive phenomena and flare explosions. At great heights, the corona transitions into the ever-outflowing solar wind, whose speed and three-dimensional morphology are controlled by the global coronal magnetic field. Coronal magnetism is thus at the heart of any understanding of the nature of

the corona and essential for predictive capability of how the Sun affects the Earth Coronal magnetometry is a subject that requires a concerted effort to draw together the different strands of research happening around the world Each method provides some information about the field but none of them can be used to determine the full 3D field structure in the full volume of the corona Thus we need to combine them to understand the full picture The purpose of this Frontiers Research Topic on Coronal Magnetometry is to provide a forum for comparing and coordinating these research methods and for discussing future opportunities

*Introduction to Regional Snowfall Index* Gilad James, PhD, The Regional Snowfall Index or RSI is a numerical system developed by the National Oceanic and Atmospheric Administration NOAA in the United States to help quantify and compare the severity of snowstorms across different regions The RSI takes into account several factors including the amount of snowfall the area affected and the population density of the affected region By using this index meteorologists and emergency management officials can better prepare for and respond to snowstorms The RSI is calculated on a scale of 1 to 5 with 5 being the most severe A Category 1 snowstorm is considered a moderate event affecting a relatively small area with limited population A Category 5 snowstorm on the other hand is a major event affecting a large region with high population density and potentially catastrophic impacts The RSI is a valuable tool for assessing and communicating the potential impacts of snowfall allowing officials to make more informed decisions regarding resource allocation and emergency response

**HC 902 - The Work of the Immigration Directorates: Calais** Great Britain. Parliament. House of Commons. Home Affairs Committee,2015 Calais is the closest entry point to the UK from Europe with frequent ferry services to Dover the Eurotunnel Shuttle service to Folkestone and direct passenger trains to London St Pancras About 10 million passengers and about 89 billion worth of UK trade pass through the port of Calais every year A further 20 million passengers pass through the tunnel on Eurostar or the Shuttle Most of the traffic is freight Most of the passengers are British citizens on leisure trips The growing number and living conditions of migrants in Calais and the enhanced security measures brought in to counter them have affected the residents of Calais the reputation of the port of Calais and the ease with which trade and traffic can pass between Britain and the Continent The number of migrants at Calais has increased over 2014 from an estimated 1 300 in September to about 2 500 by the end of October The majority are from countries that have been affected by war or civil unrest Most are men and from Somalia Sudan Eritrea and Syria in 2013 Syria overtook Afghanistan as the top country of origin of asylum seekers in the world Some of the migrants live in squats and small camps in the town of Calais but most live in makeshift tents made out of plastic sheets and canvas poorly constructed located in empty industrial sites or woodland The camps are not permanent and Calais is not the final destination

but a staging post for migrants wishing to enter the UK illegally The UK cannot ignore the issues around Calais While security in France is the responsibility of the French authorities the UK operates juxtaposed border controls in Calais and Coquelles These juxtaposed controls enable all border administration for entry to the UK to take place before passengers and vehicles leave France Efficient management of queues and the ability to deliver on time are important both to avoid disruption to carriers timetables and to avoid the excessive build up of traffic on the surrounding road network As well as ensuring the efficient and timely processing of travellers and freight the border controls are needed to ensure the integrity of the UK border

*The Airline Revolution* Gordon Mills, 2016-07-15 When starting new airlines in response to government deregulation entrepreneurs in the U S and Europe reduced some traditional service qualities to reduce costs concentrated on non stop services between city pairs not already so connected improved on time performance and offered low fares to win leisure travelers from the incumbents and to encourage more travel In recent developments some of the new airlines have offered optional extras at higher fares to attract business travelers and entered major routes alongside the legacy carriers Within both the U S and Europe deregulation removed most geographical barriers to expansion by short haul airlines Later limited deregulation spread to other world regions where many short haul routes connect city pairs in different countries and where governments have retained traditional two country mechanisms restricting who may fly To gain access to domestic routes in other countries some new airlines are setting up affiliate companies in neighboring countries with each company legally controlled in the country of domicile With air travel growing strongly especially in Asia a common result is intense but potentially short lived competition on major routes The recent developments give clear signposts to likely mid term outcomes and make this an opportune time to report on the new airline scene The Airline Revolution will provide valuable economic analysis of this climate to students airline professionals advancing to senior positions public servants and others who provide advice to governments

HC 311 - Impact of Changes to Civil Legal Aid Under Part 1 of the Legal Aid, Sentencing and Punishment of Offenders Act 2012 Great Britain. Parliament. House of Commons. Justice Committee, 2015 Since the reforms came into effect there has been a significant underspend in the civil legal aid budget because the MoJ failed to ensure that those who are eligible for legal aid are able to access it This has been partly due to a lack of public information including information about the Civil Legal Advice telephone gateway for debt advice and the Committee recommends that the MoJ take prompt steps to redress this The Committee also concludes that the exceptional cases funding scheme has not worked as Parliament intended It was supposed to act as a safety net protecting

access to justice for the most vulnerable The Committee expects the MoJ to react rapidly to ensure that the scheme fulfils Parliament's intention that the most vulnerable people are able to access legal assistance The Government's reforms have led to an increase in the number and a change in the profile of litigants in person increasingly these are people who have no choice but to represent themselves and who may thus have difficulty in doing so effectively although many tribunals are accustomed to dealing with unrepresented litigants the courts have to expend more resources in order to assist them The MoJ has not been able to demonstrate that it has achieved value for money for the taxpayer Although significant savings have been achieved efforts to target legal aid at those who most need it have focused on intervention aimed at the point after a crisis has already developed rather than on prevention
