Geography for Educators Susan Wiley Hardwick, Donald G. Holtgrieve, 1996 This book links the new National Geography Standards with the five Fundamental Themes of Geography using a systematic approach that builds from basic knowledge to more complex explaining the physical cultural and economic systems that interrelate and operate on the planet It encourages teachers to move beyond the traditional stereotype of geography as place memorization toward conceptual thinking about how Earth systems work Discusses the importance of geographic literacy in an era of increasingly important global interconnections Surveys the historic role of geography education in North American schools and provides examples of how geography is taught in other countries Covers geographic education revolution in the United States Interrelates the Five Themes of Geography and the eighteen National Geography Standards into a uniform and convenient structure for the study of any place or any topic from a geographic perspective Location Place Human Environment Interaction Movement and Region For educators or teacher certification programs Official Gazette of the United States Patent and Trademark Office ,2001 *Bulletin - Bureau of Education* United States. vitality safety and order while stigmatizing Tijuana as a zone of poverty crime and corruption These dualisms misrepresent complex realities on the ground but they also have real material effects the vision of a local border benefits some actors in the region while undermining others Based on a wide range of original empirical materials the book examines how asymmetries between these cities have been produced and reinforced through stigmatizing representations of Tijuana in media everyday talk economic relations and local tourism discourse and practices However both place stigma and borders are subject to contestation and the book also examines debordering practices and counter narratives about Tijuana s image While the details of the book are particular to this corner of the world the kinds of processes it documents offer a window into the making of unequal neighbors more broadly The dynamics at the Tijuana border present a framework for understanding how inequalities that manifest in cultural practices produce asymmetric borders between places
