### **Towards an embodied science of intersubjectivity: Widening the scope of social understanding research**

Ezequiel Di Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition. This problem is understood as how we figure out other minds relying only on indirect manifestations of other people's intentional states which are assumed to be hidden, private and internal. Research on this question has mostly investigated how individual cognitive mechanisms achieve this task. A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes. This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed. Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds. These phenomena include acting and perceiving together, verbal and non-verbal engagement, experiences of disconnection, management of relations in a group, joint meaning making, intimacy, trust, conflict, negotiation, asymmetric relations, material mediation of social interaction, collective action, contextual engagement with socio-cultural norms, structures and roles etc. These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research. We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena. This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity, the social mind writ large. To contribute to this goal we encouraged contributions in psychology, neuroscience, psychopathology, philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive, from observational to participatory.

Managing Discovery in the Life Sciences Philip A. Rea, Mark V. Pauly, Lawton R. Burns, 2018-02 Addresses in roughly equal measure the science and management behind several recent marketable biomedical innovations Advanced Data Mining and Applications Xudong Luo, Jeffrey Xu Yu, Zhi Li, 2014-12-17 This book constitutes the proceedings of the 10th International Conference on Advanced Data Mining and Applications ADMA 2014 held in Guilin, China during December 2014. The 48 regular papers and 10 workshop papers presented in this volume were carefully reviewed and selected from 90 submissions. They deal with the following topics: data mining, social network and social media, recommend systems, database dimensionality reduction, advance machine learning techniques, classification, big data and applications, clustering methods, machine learning and data mining, and database. *Science Blogging* Christie Wilcox, Bethany Brookshire, Jason G. Goldman, 2016-01-01 Here is the essential how to guide for communicating scientific research and discoveries online, ideal for

journalists researchers and public information officers looking to reach a wide lay audience Drawing on the cumulative experience of twenty seven of the greatest minds in scientific communication this invaluable handbook targets the specific questions and concerns of the scientific community offering help in a wide range of digital areas including blogging creating podcasts tweeting and more With step by step guidance and one stop expertise this is the book every scientist science writer and practitioner needs to approach the Wild West of the Web with knowledge and confidence

**Biological Engagement Programs: Reducing Threats and Strengthening Global Health Security Through Scientific Collaboration** Jeanne M. Fair, Hillary H. Carter, Nathan Wolfe, 2017-09-13 Biological engagement programs are a set of projects or activities between partner countries that strengthen global health security to achieve mutually beneficial outcomes Engagement programs are an effective way to work collaboratively towards a common threat reduction goal usually with a strong focus on strengthening health systems and making the world a safer place Cooperative programs are built upon trust and sharing of information and resources to increase the capacity and capabilities of partner countries Biological engagement programs reduce the threat of infectious disease with a focus on pathogens of security concern such as those pathogens identified by the U S Government as Biological Select Agent and Toxins These programs seek to develop technical or scientific relationships between countries to combat infectious diseases both in humans and animals Through laboratory biorisk management diagnostics pathogen detection biosurveillance and countermeasure development for infectious diseases deep relationships are fostered between countries Biological engagement programs are designed to address dual use issues in pathogen research by promoting responsible science methodologies and cultures Scientific collaboration is a core mechanism for engagement programs are designed to strengthen global health security including prevention of avoidable epidemics detection of threats as early as possible and rapid and effective outbreak response This Research Topic discusses Biological Engagement Programs highlighting the successes and challenges of these cooperative programs Articles in this topic outlined established engagement programs as well as described what has been learned from historical cooperative engagement programs not focused on infectious diseases Articles in this topic highlighted selected research trainings and programs in Biological Engagement Programs from around the world This Topic eBook first delves into Policies and Lessons Learned then describes Initiatives in Biosafety the core of this work documents Cooperative Research Results from the field then lastly the Topic lays out potential Future Directions to the continued success of the World s cooperative science in reducing the threat of infectious diseases

**Nanotechnology in Functional Foods** Tanima Bhattacharya, Shakeel Ahmed, 2022-08-23 NANOTECHNOLOGY IN FUNCTIONAL FOODS The broad applicability of bioactive delivery systems for improving food quality safety and human health will make this book a valuable resource for a wide range of readers in industry research and academia Functional foods is an emerging trend in the food industry whose potential value is determined by whether they are safe with respect to consumer health Nanotechnology in Functional Foods was written to

help the reader better understand the benefits and concerns associated with these foods In addition to giving an overview of the current state of the art in functional foods different aspects of the advanced research being conducted on their extraction synthesis analysis and biological effects are presented Besides focusing on several synthesis techniques the book also discusses the application of nanoparticles in nutrient delivery and pharmaceuticals such as nano emulsions solid lipid nanoparticles and polymeric nanoparticles their properties and interactions with other food components and their impact on the human body the consumer acceptance and diversification of these nutrients Moreover new trends are discussed concerning the application of artificial intelligence in screening various components of functional foods Audience The book will be central to food scientists materials scientists biotechnologists medicinal chemists pharmacists and medical professionals Tanima Bhattacharya PhD is a formulation scientist who completed her Doctoral degree in Food Processing Nutrition Science from the Indian Institute of Engineering Science and Technology Shibpur West Bengal India and gained overseas post doctoral experience from the College of Chemistry and Chemical Engineering Hubei University of China She has published several scientific research articles in international peer reviewed journals and her research interests include the fabrication of biocompatible nanostructures and studying their properties and applications in the area of food science technology and biomedical sciences Shakeel Ahmed PhD is an assistant professor of Chemistry at the Higher Education Department Government of Jammu and Kashmir India His PhD degree in Chemistry is from Jamia Millia Islamia A Central University New Delhi He has published several research publications in the area of green nanomaterials and biopolymers for various applications including biomedical packaging and water treatment He has published more than 20 books in the area of nanomaterials and green materials

**Is There Purpose in Biology?** Denis Alexander, 2018-06-22 Atheists assert that the natural world has no meaning or purpose Dr Denis Alexander Emeritus Director of The Faraday Institute for Science and Religion at St Edmunds College Cambridge draws a different conclusion Not only do recent evolutionary biological data appear inconsistent with the claim that the world is purposeless but the Christian doctrine of creation has provided and continues to provide both context and stimulus for the study of the natural world Christians started biology However is a belief in an omnipotent benign Creator consistent with a world of pain and suffering From a lifetime s study in the biological sciences Denis Alexander believes that whilst the cost of existence is extremely high it can nonetheless be squared with the idea of a God of love whose ultimate purposes for humankind render that cost more comprehensible

**Systems Orthodontics** Pietro Auconi,Guido Caldarelli,Antonella Polimeni,2024-09-16 This book marks one of the first applications of the Medicine Network discipline to an everyday scenario It explores situations where patients often in adolescence grapple with the decision of whether to commence a treatment seeking insights into the more plausible future scenarios Additionally the specific feedback from biological systems in the human body serves as a potent metaphor for addressing various challenges in the field of Complex Systems In recent times systems thinking and complexity theory have yielded substantial conceptual advancements across various research domains In the context of orthodontics these approaches offer a more comprehensive understanding in contrast to the traditional mechanistic approach which primarily focuses on the analysis of applied forces Systems thinking directs attention to the interaction among dentoskeletal components where the behavior of one element can influence others The amalgamation of multiple elements leads to entities with properties distinct from those of individual components The increasing complexity of orthodontic reality beyond clinical or radiological observations necessitates the development of new theories Complexity theory has demonstrated that emergent properties in biological systems can be discerned through appropriate computational models as opposed to the analytical study of individual components The central metaphor for the interactive craniofacial system during growth is

portrayed by the facial topology revealed through network analysis facilitating a systemic reevaluation of traditional orthodontic theories This book delineates the novel insights derived from the clinical computational approach applicable for a prognostic and early interception perspective in managing dentofacial dysmorphoses Its objective is to captivate practitioners and persuade them of the practical utility of these innovative approaches **The Importance of Being Little**

Erika Christakis,2016-02-09 Christakis expertly weaves academic research personal experience and anecdotal evidence into her book a bracing and convincing case that early education has reached a point of crisis her book is a rare thing a serious work of research that also happens to be well written and personal engaging and important Washington Post What kids need from grown ups but aren t getting an impassioned plea for educators and parents to put down the worksheets and flash cards ditch the tired craft projects yes you Thanksgiving Handprint Turkey and exotic vocabulary lessons and double down on one simple word play NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child s eye view of the learning environment To a four year old watching bulldozers at a construction site or chasing butterflies in flight the world is awash with promise Little children come into the world hardwired to learn in virtually any setting and about any matter Yet in today s preschool and kindergarten classrooms learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child s intelligence while overtaxing the child s growing brain These mismatched expectations wreak havoc on the family parents fear that if they choose the wrong program their child won t get into the right college But Yale early childhood expert Erika Christakis says our fears are wildly misplaced Our anxiety about preparing and safeguarding our children s future seems to have reached a fever pitch at a time when ironically science gives us more certainty than ever before that young children are exceptionally strong thinkers In her pathbreaking book Christakis explains what it s like to be a young child in America today in a world designed by and for adults where we have confused schooling with learning She offers real life solutions to real life issues with nuance and direction that takes us far beyond the usual prescriptions for fewer tests more play She looks at children s use of language their artistic expressions the way their imaginations grow and how they build deep emotional bonds to stretch the boundaries of their small worlds Rather than clutter their worlds with more and more stuff sometimes the wisest course for us is to learn how to get out of their way Christakis s message is energizing and reassuring young children are inherently powerful and they and their parents will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood revealing a place that s rich with possibility **The Routledge Handbook of Hospitality Studies** Conrad

Lashley,2016-11-10 In recent years there has been a growing interest in the study of hospitality as a social phenomenon This interest has tended to arrive from two communities The first comprises hospitality academics interested in exploring the

wider meanings of hospitality as a way of better understanding guest and host relations and its implications for commercial settings The second comprises social scientists using hosts and guests as a metaphor for understanding the relationship between host communities and guests as people from outside the community migrants asylum seekers and illegal immigrants The Routledge Handbook of Hospitality Studies encourages both the study of hospitality as a human phenomenon and the study for hospitality as an industrial activity embracing the service of food drink and accommodation Developed from specifically commissioned original contributions from recognised authors in the field it is the most up to date and definitive resource on the subject The volume is divided into four parts the first looks at ways of seeing hospitality from an array of social science disciplines the second highlights the experiences of hospitality from different guest perspectives the third explores the need to be hospitable through various time periods and social structures and across the globe while the final section deals with the notions of sustainability and hospitality This handbook is interdisciplinary in coverage and is also international in scope through authorship and content The state of the art orientation of the book is achieved through a critical view of current debates and controversies in the field as well as future research issues and trends It is designed to be a benchmark for any future assessment of the field and its development This handbook offers the reader a comprehensive synthesis of this discipline conveying the latest thinking issues and research It will be an invaluable resource for all those with an interest in hospitality encouraging dialogue across disciplinary boundaries and areas of study Chapters Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

*Monocytes and Macrophages in Development, Regeneration, and Disease* Malgorzata Kloc, Jacek Z. Kubiak, Marta Halasa, 2024-10-16 The study and therapeutic application of macrophages is a rapidly developing field Tremendous progress has been made in understanding the phenotypes and functions of macrophages in healthy and diseased tissues and organs Following the great success of Volume 62 *Macrophages Origin Functions and Biointervention* published in this series this new book now focuses on the role of monocytes and macrophages in development regeneration and disease This new volume offers an overview of the latest developments in monocyte and macrophage subtypes and functions across various tissues including adipose tissue bones liver lungs testes and the nervous system The book also reviews existing and potential therapies targeted towards the macrophages and describes their homeostatic functions It explores how macrophage cell cycle metabolism mitochondrial activity histone acetylation status and interaction with the extracellular matrix contribute to changes in macrophage phenotype and function in health and disease Additionally it examines the interactions between macrophages and cancer cells bacteria helminth parasites and their role in the colonization and spread of HIV For ease of reference the volume is divided into three sections Part I Nonimmunologic and immunologic functions of monocytes macrophages Part II Tissue organ specific functions of macrophages Part III Macrophage functions and dysfunction in diseases This book will be of interest to researchers working

in the fields of developmental biology immunology cancer research and therapeutic applications It is written to inform and inspire experts and newcomers to the field of macrophages      Structural Inequalities and Health Outcomes for Chronic Disease Leonard E. Egede, 2025-05-23 Structural Inequalities and Health Outcomes for Chronic Disease provides a conceptual framework for understanding existing evidence and guides the research around promising interventions and policies In addition it demonstrates how structural inequalities impact health and presents ways the healthcare system can participate in the solution The book covers major chronic diseases and the special populations impacted by structural inequalities Those working and studying public health medicine nursing pharmacology will find this work of interest as well as diversity and disparity scholars and health policymakers Presents the concepts underlying the emerging field of structural inequalities Provides examples of the influence of structural inequality on chronic disease and special populations Identifies the path forward and how to engage in changing structural inequalities      **Recent Advances in  $\gamma\delta$  T Cell Biology: New**

**Ligands, New Functions, and New Translational Perspectives** Dieter Kabelitz, Julie Dechanet-Merville, 2016-02-16 Gamma delta T cells are a small subset of T lymphocytes in the peripheral circulation but constitute a major T cell population at other anatomical localizations such as the epithelial tissues In contrast to conventional T cells the available number of germline genes coding for T cell receptor TCR variable elements of T cells is very small Moreover there is a preferential localization of T cells expressing given Vgamma and Vdelta genes in certain tissues In humans T cells expressing the Vg9Vd2 encoded TCR account for anywhere between 50 and 95% of peripheral blood T cells whereas cells expressing non Vd2 genes dominate in mucosal tissues In mice there is an ordered appearance of T cell waves during embryonic development resulting in preferential localization of T cells expressing distinct VgammaVdelta genes in the skin the reproductive organs or gut epithelia The major function of T cells resides in local immunosurveillance and immune defense against infection and malignancy This is supported by the identification of ligands that are selectively recognized by the TCR As an example human Vgamma9Vdelta2 T cells recognize phosphorylated metabolites phosphoantigens that are secreted by many pathogens but can also be overproduced by tumor cells providing a basis for a role of these T cells in both anti infective and anti tumor immunity Similarly the recognition of endothelial protein C receptor by human non Vdelta2 T cells has recently been identified to provide a link for the role for such T cells in immunity against epithelial tumor cells and cytomegalovirus infected endothelial cells In addition to classical functions such as cytokine production and cytotoxicity recent studies suggest that subsets of T cells can exert additional functions such as regulatory activity and quite surprisingly professional antigen presenting capacity It is currently not well known how this tremendous extent of functional plasticity is regulated and what is the extent of TCR ligand diversity Due to their non MHC restricted recognition of unusual stress associated ligands T cells have raised great interest as to their potential translational application in cell based immunotherapy Topics of this Research Focus include Molecular insights into the activation and differentiation requirements of T cells role of

pyrophosphates and butyrophilin molecules for the activation of human T cells role of T cells in tumor immunity and in other infectious and non infectious diseases and many others We are most grateful to all colleagues who agreed to write a manuscript Thanks to their contributions this E book presents an up to date overview on many facets of the still exciting T cells Dieter Kabelitz Julie D chanet Merville      Global Medical Education in Normal and Challenging Times Shabih H. Zaidi,Shahid Hassan,Shoaleh Bigdeli,Tabassum Zehra,2024-05-29 This book is written by several medical educators from developed as well as developing countries based on decades of experience in teaching The unique experience gained during the COVID 19 pandemic has added new dimensions to the traditional pedagogy andragogy and heutagogy documented here The salient topics include distance learning virtual classrooms virtual workshops on OSCEs open book exams micro learning micro credentialing blended or digitalized curriculum delivery academic leadership communication skills professionalism telemedicine bioethics cyber clinics artificial intelligence etc This book is used as a text or reference book by physicians teachers scholars students and medical universities for teachers training capacity building and guidance on fundamental pillars of cognitive domains of knowledge skills and attitude as well as factual conceptual procedural and metacognitive skills It is also a source of guidance in faculty enhancement and toward continued quality improvement in medical education

The Top Books of the Year Scope For Grade 10 Life Science 2014 On December The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthraling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
