Azizan,2020-08-31 The 1st Conference of Visual Art Design and Social Humanities CONVASH 2019 is a seminar in the fields of art design and humanities held on November 2 2019 by the Faculty of Fine Arts and Design FSRD Universitas Sebelas Maret in Surakarta Indonesia Since its establishment as a Faculty 5 years ago The Faculty of Fine Arts and Designs has conducted 4 international conferences The 1st CONVASH 2019 is our international conference new brand and we have a commitment to hold CONVASH annually Conference of Visual Art Design and Social Humanities CONVASH 2019 is a tangible manifestation of FSRD s efforts to contribute to science and improve publication quality on the international level This event is expected to bring about collaboration scientific transfer and publications that can contribute to the scientific fields of arts design and humanities The conference aims to facilitate research presentations and knowledge exchange in art design technology and social humanities as well as create academic networks among students lecturers and researchers in the related fields Further this conference will bring opportunities to learn together to develop quality research in various fields expand the collaboration networks among universities and industries and become a forum to disseminate research and knowledge to a wider audience The committee received more than 130 papers from the participants and based on the results of the reviews only 96 papers were declared qualified to be presented at the seminar and subsequently published in the proceedings of CONVASH 2019 Finally the committee congratulates and expresses gratitude to the selected participants for the participation and paper publication in the proceeding of CONVASH 2019 The committee would also like to thank all parties who have supported and actively participated for the success of this event Hopefully this Proceeding can be used as a reference for technological development and learning improvement in the fields of education social arts and humanities

Effects of integrated learning: explicating a mathematical concept in inquiry-based science camps Louise Bindel,2018 Although various arguments for integrated learning of mathematics and science exist empirical evidence that integrated learning is as beneficial as anticipated is limited Therefore this quasi experimental study investigates the effect of integrated learning of mathematics and science on eight student variables by comparing it to a control group Results show that integrated learning is no miracle cure but has positive and negative effects on specific student outcomes Whereas integrated learning effects students view of the relation between mathematics and science positively it effects students scientific self concept negatively Thus integrated learning should not substitute but rather complement disciplinary learning Obwohl zahlreiche Argumente f r das integrierte Lernen von Mathematik und Naturwissenschaften existieren ist die vorteilhafte Wirkung integrierten Lernens begrenzt empirisch belegt Im Rahmen dieser quasi experimentellen Studie wird der Effekt integrierten Lernens auf acht Sch lervariablen durch Vergleiche mit einer Kontrollgruppe untersucht Die Ergebnisse zeigen dass integriertes Lernen kein Allheilmittel ist sondern positive und negative Effekte auf bestimmte Sch lervariablen hat W hrend integriertes Lernen die Sicht der Sch lerinnen und Sch ler auf die Beziehung zwischen Mathematik und Naturwissenschaften positiv beeinflusst hat es einen negativen Effekt auf das naturwissenschaftliche Selbstkonzept

Daher sollte integriertes Lernen nicht stellvertretend sondern ergänzend zu disziplinärem Lernen implementiert werden

Formal Concept Analysis Cynthia Vera Glodeanu, Mehdi Kaytoue, Christian Sacarea, 2014-06-05 This book constitutes the refereed proceedings of the 12th International Conference on Formal Concept Analysis ICFA 2014 held in Cluj Napoca Romania in June 2014 The 16 regular papers presented together with 3 invited talks were carefully reviewed and selected from 39 submissions The papers in this volume cover a rich range of FCA aspects such as theory enhanced FCA Knowledge discovery and knowledge spaces as well as methods and applications In addition the book contains a reprint of the first publication Sub direct decomposition of concept lattices by Rudolf Wille Inside the Mathematics Class Uwe

Gellert, Christine Knipping, Hauke Straehler-Pohl, 2018-09-26 This volume is a forward looking intersection of Sociological perspectives on mathematics classrooms and socio political perspectives on mathematics education The first perspective has generated a substantial body of knowledge in the mathematics education Interactionist research has deepened our understanding of interaction processes socio mathematical norms and the negotiation of meaning generating a micro sociology or a micro ethnography of the mathematics classroom More recently socio political perspectives on mathematics education interrelate educational practices in mathematics with macro social issues of social equity class and race and with the policies that regulate institutionalized mathematics education This book documents strings together and juxtaposes research that uses ethnographical classroom data to explain on the one hand how socio political issues play out in the mathematics class On the other hand it illuminates how class race etc affect the micro sociology of the mathematics classroom The volume advances the knowledge in the field by providing an empirical grounding of socio political research on mathematics education and it extends the frame in which mathematical classroom cultures are conceived **Design**

Systems from Geological, Geochemical and Geophysical Studies K. Gessner, T.G. Blenkinsop, P.

Sorjonen-Ward, 2018-08-07 Economically viable concentrations of mineral resources are uncommon in Earth's crust Most ore

deposits that were mined in the past or are currently being extracted were found at or near Earth's surface often serendipitously To meet the future demand for mineral resources exploration success hinges on identifying targets at depth Achieving this requires accurate and informed models of the Earth's crust that are consistent with all available geological geochemical and geophysical information paired with an understanding of how ore forming systems relate to Earth's evolving structure Contributions to this volume address the future resources challenge by i applying advanced microscale geochemical detection and characterization methods ii introducing more rigorous 3D Earth models iii exploring critical behaviour and coupled processes iv evaluating the role of geodynamic and tectonic setting and v applying 3D structural models to characterize specific ore forming systems

Action Science William H. Robertson, 2014-04-03 This book provides an approach to physical science instruction in a way that is interesting and engaging to students featuring author created action sports videos and classroom activities focused on physical science concepts

Handbook of Research on Science Education, Volume II Norman G. Lederman, Sandra K. Abell, 2014-07-11 Building on the foundation set in Volume I a landmark synthesis of research in the field Volume II is a comprehensive state of the art new volume highlighting new and emerging research perspectives The contributors all experts in their research areas represent the international and gender diversity in the science education research community The volume is organized around six themes theory and methods of science education research science learning culture gender and society and science learning science teaching curriculum and assessment in science science teacher education Each chapter presents an integrative review of the research on the topic it addresses pulling together the existing research working to understand the historical trends and patterns in that body of scholarship describing how the issue is conceptualized within the literature how methods and theories have shaped the outcomes of the research and where the strengths weaknesses and gaps are in the literature Providing guidance to science education faculty and graduate students and leading to new insights and directions for future research the Handbook of Research on Science Education Volume II is an essential resource for the entire science education community

Exotic Nuclei (Iasen-2013) - Proceedings Of The First International African Symposium On Exotic Nuclei Yuri Erastovich Penionzhkevich, Evgeni A Cherepanov, Dmitri Kamanin, Robert Bark, John Christopher Cornell, 2014-11-20 This book is a

collection of talks presented at the First International African Symposium on Exotic Nuclei IASEN 2013 The symposium was held at Cape Town South Africa from 2 6 December 2013 The IASEN2013 was dedicated to the problems of producing and investigating nuclei far from the line of stability The symposium was organized by two scientific centers iThemba LABS South Africa and the Joint Institute for Nuclear Research Dubna The main goal of the Symposium was to discuss the latest results on the production and study of the properties of the lightest to heaviest nuclei as well as the plans for future joint investigations in the field of exotic nuclei The talks were presented by the leading scientists in the field Among the topics of the symposium were the following production and study of properties of nuclei in extreme states strongly deformed nuclei highly excited and nuclei far from the line of stability as well as nuclei having large angular momenta New results of the investigations are presented in this book In particular the latest results on the synthesis of new superheavy elements are also presented At the Symposium were talks devoted to existing detecting devices and accelerators of exotic nuclei as well as to the future projects for the creation of similar set ups

Quality of Instruction in Physics Hans E. Fischer, Peter Labudde, Knut Neumann, Jouni Viiri, 2014 This book reports the findings from the tri national video study Quality of Instruction in Physics QuIP Within the scope of the QuIP study physics instruction was investigated in a total of 103 classes from Finland North Rhine Westphalia Germany and German speaking Switzerland The main aim was to identify typical patterns of physics instruction of the three samples and to investigate conditions under which these patterns are successful with respect to students learning interest and motivation Among others instructional characteristics the quality of students practical work successful patterns of sequencing the subject matter structure and teaching strategies were investigated by means of analyses of video recorded lessons Variables external to instruction that were investigated included teachers professional knowledge and students cognitive abilities The study followed a pre post design with data collection prior to and after an instructional unit on electrical energy and power The results are well in line with the findings from large scale international studies indicating a particularly successful instructional pattern in Finland A comparison of characterisation of instruction in comparison between the three countries reveals important findings for the improvement of the teaching and learning of physics in secondary school education

Current Perspectives on the Value, Teaching, Learning, and Assessment of Design in STEM Education Jeffrey Buckley, Eva Hartell, Nicolaas Blom, 2023-08-25 Design is a central activity within Science Technology Engineering and Mathematics STEM education Within enacted practice design can feature within intended learning outcomes for example in learning to design and it can feature within pedagogical methodologies for example by learning through design Often holding differing disciplinary interpretations such as design as cyclical problem solving iterative design conceptual design or design with or without make understanding the educational merits of the ill defined and open nature of authentic designerly activity is paramount This Research Topic sets out to gain a more nuanced understanding of the value and roles of design within STEM educational contexts This Research Topic focuses

on design within STEM educational contexts particularly in terms of teaching learning and assessment The aim is to contribute to the evidential basis which can be used to guide the incorporation of design into educational practice The topic has two central research objectives The first is to generate evidence regarding what design is in STEM education For example is the ability to design a singular or manifold construct Is the capacity to design or are factors of this ability both learnable and teachable How transferable is designerly knowledge between contexts How do different disciplinary contexts influence the interpretation of design The second is to further our understanding of how best to incorporate design within STEM education contexts For example how much emphasis should be placed on learning to or through design in school How should design be assessed within formal education Where and when is design best incorporated into education In posing these questions the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education

Multidisciplinary Computational Anatomy Makoto Hashizume, 2021-11-30 This volume thoroughly describes the fundamentals of a new multidisciplinary field of study that aims to deepen our understanding of the human body by combining medical image processing mathematical analysis and artificial intelligence Multidisciplinary Computational Anatomy MCA offers an advanced diagnosis and therapeutic navigation system to help detect or predict human health problems from the micro level to macro level using a four dimensional dynamic approach to human anatomy space time function and pathology Applying this dynamic and living approach in the clinical setting will promote better planning for and more accurate effective and safe implementation of medical management Multidisciplinary Computational Anatomy will appeal not only to clinicians but also to a wide readership in various scientific fields such as basic science engineering image processing and biomedical engineering All chapters were written by respected specialists and feature abundant color illustrations Moreover the findings presented here share new insights into unresolved issues in the diagnosis and treatment of disease and into the healthy human body

School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work The book highlights trends and patterns in the enactment and role of practical work across African countries Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach The book provides empirical research on approaches to practical work contextual factors in the enactment of practical work and professional development in teaching practical work This book will be of great interest to academics researchers and post graduate students in the fields of science education and educational policy

Evolution

Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much needed common background for future evolution education research across the globe.
