## **Recession Maintenance Guideline To Maintain During Recession:**

*How to Combat Recession* Laurence S. Seidman, 2018 Recessions are a recurring phenomenon and there are repeated debates about how to combat them when the crisis hits and after the economy begins to grow again Laurence Seidman argues that currently we are not ready to combat the next recession A recession involves a plunge in aggregate demand for goods and services which compels producers to cut production and employment Fortunately a large boost in demand can be achieved by a large fiscal stimulus primarily a temporary large increase in tax rebates for households plus several fiscal supplements But fiscal stimulus has always involved a large increase in government debt something Congress understandably resists The assumption that a large fiscal stimulus requires an increase in government debt is false Seidman asserts in this thought provoking book In fact it is astonishingly easy to implement even a very large fiscal stimulus without any increase in government debt All it takes is for Congress to enact a fiscal stimulus and the Federal Reserve to make a transfer not loan to the Treasury roughly equal to the fiscal stimulus so the Treasury doesn't have to borrow Stimulus without debt consists of a transfer not loan from the Federal Reserve to the Treasury so that the Treasury does not have to borrow to finance fiscal stimulus enacted by Congress Seidman explains all aspects of this new way to combat recession stimulus without debt He presents evidence that fiscal stimulus works in a recession it increases aggregate demand which stimulates production and employment He explains why the fiscal stimulus should consist primarily of tax rebates for households plus several fiscal supplements His analysis covers basic foundations as well as implications for inflation central banks and how to address secular stagnation When the next recession hits we will be ready to combat it if we know how to use fiscal stimulus without increasing government debt Seidman shows us how Maintenance Engineering for Buildings Ntebo
