Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Eugene Garfield 1925-2017 Antonella De Robbio, Raman Nair R, 2017-04-01. Garfield's greatest contribution to science was the Science Citation Index (SCI). It is a system that is used to chart connections between pieces of scientific literature. It is not only an intellectual achievement but also an information engineering marvel covering millions of records from numerous subject fields and communicated over worldwide networks. These databases became the foundation of the online research tool called the Web of Knowledge. And it has now become accessible electronically via the Web of Science. Garfield enabled information retrieval to scale up, basically creating the entire information science field as we know it today. His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge. This is Informatics Studies 4.2, which is the Eugene Garfield Memorial Issue. It gives a bird's eye view of Garfield's life and work and consists of an 80-page interview of Garfield published in print for the first time, presenting his views on impact of information systems in scientific research, NGOs, the future of Open Access, current research and Big science, which can guide academic administrators, science policy makers in governments and scientists.

Common Knowledge Moira Cockell, Jerome Billotte, Frederic Darbellay, Francis Waldvogel, 2011-02-01. Knowledge is a living thing sustained through dynamic reflexive processes. Whether at the level of cellular signaling pathways, Internet design or sociocultural interactions, human understanding grows and accrues value through bi-directional transmission across networks of emitters and receptors. And the cross-fertilization of ideas from different fields is essential.

Comparative Legal Metrics, 2023-08-28. The trend of measuring performances is global and pervasive. We all live in quantified societies in which performances in an ever-growing array of fields from education to health, work to credit, justice to consumption are assessed and governed through quantitative techniques. While the disruption brought by the quantitative turn has been widely studied by social scientists, legal research on the issue is minimal. This book aims to fill the gap. The essays herein collected explore how performance measurements interact with the law in different regions and sectors, which legal effects they produce and for whose benefit.

Evaluating Academic Legal Research in Europe Rob van Gestel, Andreas Lienhard, 2019. The Web of Knowledge Eugene Garfield, 2000. This new ASIST monograph is the first to comprehensively address the history, theory, and practical applications of citation analysis, a field which has grown from Garfield's seed of an idea and to examine its impact on scholarly research forty years after its inception. In bringing together the analyses, insights, and reflections of more than thirty-five leading lights, editors Cronin and Atkins have produced both a comprehensive survey of citation indexing and its applications and a beautifully realized tribute to Eugene Garfield and his vision in honor of his seventy-fifth birthday.
