

Forming a research project using the scientific method: a research experiment on maple syrup production

By Sarah Lehnert

National Science Foundation Graduate STEM Fellow in K-12 Education

Sugar Creek Watershed K-12 Education Program

The Ohio State University-Ohio Agricultural Research and Development Center

Abstract: The purpose of this activity is to introduce high school freshmen to the scientific method and report writing through the design, implementation, and analysis of a semester-long experiment. The students were responsible for designing a research project on sap production in maple trees beginning with the formation of a research question and ending with a full research report written in standard scientific format.

Grade level: 9th (Botany)

Objectives: 1) Introduce students to the scientific method, 2) give student real-life experience designing and analyzing a research project, 3) use a local resource (woodlot) for place-based learning, and 4) provide students with practice writing a scientific report.

National Standards: Understanding of:

- * Scientific inquiry
- * Natural resources
