

The Scientific METHOD

1st Ask a Question or Make an Observation

What are you curious about, or what have you seen that makes you wonder?

2nd Write a Hypothesis

What do you think is the answer to your question or the reason for your observation?

3rd Make Predictions

What are some if/then statements that explain and confirm your hypothesis?

4th Perform Tests or Experiments

What will you do to test your predictions? Your hypothesis may not have been correct. That's OK!

5th State Your Conclusions

What did your experiment show? Did the experiment confirm your hypothesis?

Application

How does the information you found relate to everyday life?
