Insight Turkey / Fall 2018 - The Struggle Over Central Asia , 2018-12-01 This issue of Insight Turkey comes with a different format and brings to its readers two different topics that require special attention when we consider the latest regional and global affairs The planned topic was Central Asia however the early presidential and parliamentary elections in Turkey led us to cover a second topic in the issue First the current issue focuses on a forgotten but very important region of Central Asia The second section of the journal comprises commentaries and articles on the latest elections in Turkey how to understand them and what could be the future of the presidential system Central Asia is one of the most geostrategic and penetrated regions in the world The founding father of geopolitics the British geographer Sir Halford John Mackinder considers Central Asia as a part of the heartland The control of Central Asia a region stretching from the Caspian Sea in the west to China in the east is a precondition of the world hegemony Throughout the 20th century the Central Asian countries were under the rule of the Soviet Union After the collapse of the Soviet Union the republics of Central Asia re emerged as independent actors of international politics Later they were declared as near abroad by Russia that is they were kept close to Russia through several multilateral platforms Nowadays Central Asian countries namely Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan face many challenges such as underdevelopment poor governance and corruption mutual mistrust between neighbors fear of radicalism and threats from neighboring global powers The governments of the regional countries must work together in order to be able to overcome these challenges They need to increase intra regional trade and to de securitize their relations with other countries Central Asian countries are squeezed between two heavyweight powers Russia and China With the revitalization of the historical Silk Road by China many observers began to discuss the increasing importance and role of the Central Asian countries Central Asia will be the main ground for intra East regional and global competition The mostly Turkic and Muslim countries can play the role of game changers at least between the two global actors Turkey a country which shares the same language history and culture with the Central Asian countries is also

one of the effective actors in the region After an unprepared and unsuccessful attempt to forge links in the wake of their independence in the 1990s Turkey has improved its relations with the Turkic states and now has multi dimensional relations economic cultural political and security with these countries The transformation of the Turkish political system into a presidential one after the April 16 2017 referendum was finalized with the June 24 2018 elections when Recep Tayyip Erdoğan was elected as the first Turkish president in the context of the new presidential system Naturally many questions have risen in terms of the transformation of the new system and its impact on Turkey's foreign policy This issue of Insight Turkey aims to discuss this political transformation Turkey has been governed by a multi party parliamentary system for decades The country has experienced several chaotic periods due to political instabilities mainly as a result of coalition or weak governments Since Turkey could not end the bureaucratic especially military and judiciary tutelage it could not consolidate its democracy under the parliamentary system Therefore many politicians such as Necmettin Erbakan and Süleyman Demirel asked for the transformation of the system into a presidential one At a time when the whole world has been experiencing a transformation Turkey has also decided to consolidate its political authority and therefore it has decided to transform its political system into a unified and strong executive power in order to be able to struggle against emerging threats Ultimately as a regional power and global actor Turkey now has a strong political leadership who plays an effective role in international politics In this issue we bring four manuscripts which analyze in detail the June 2018 elections and the new presidential system in Turkey On the verge of the reorganization process in Turkey Zahid Sobaczer Kseo lu and Nebi Mi in their article provide a legal and institutional analysis of how the public policy process and the roles and responsibilities of policy actors have changed with the new system Understanding the actual elections of June 24 is also very important In the light of this the detailed election analyses of Ali Arko lu and Kerem Yıldırım provide an exemplary source Furthermore Hseyin Alptekin's article deals specifically with the patterns of Kurdish votes in 24 eastern Turkish cities and contends that intra Kurdish and intra regional differences have prevailed in the June 24 elections The last piece on the elections is the commentary written by Ali Ya ar Sar bay which addresses the factors that led to the new system in Turkey through historical and sociological processes Six other manuscripts bring a general perspective on the regional and global affairs in Central Asia Experts in this area analyze the Russian Chinese competition in the region the responses of the Central Asian states and Turkey's comeback in Central Asia Morena Skalamera focusing on the rivalry between global and regional powers in Central Asia i.e. Russia China the U.S Turkey etc intends to explain the Central Asian governments failure to capitalize on these developments Mariya Omelicheva and Ruoxi Du on the other hand shed light on why Russia has abstained from a possible conflict with China when it comes to the Central Asian energy and transportation networks by arguing that Kazakhstan's multi vector foreign policy has played a crucial role in this regard This issue places a special emphasis on Kazakhstan considering that it is one of the most important regional states In the light of this the articles of Azhar Serikkaliyeva et al and

Aidar Kurmashev et al focus on the China Kazakhstan strategic partnership and Kazakhstan's example of fighting terrorism respectively. Lastly as the title of this issue suggests Turkey is redirecting its attention to Central Asia as a part of its recent foreign policy strategies. In this regards Bayram Balç and Thomas Liles provide a brief analysis of Turkey's relations with Central Asian states in the political economic and cultural areas. Furthermore Eref Yalınkılıç focuses especially on Turkey's relationship and cooperation with Uzbekistan which in the new era seems indispensable for the sake of the former's interests and influences in the region. Three off topic manuscripts conclude this issue of Insight Turkey. As Trump directs the U.S. towards isolation and continues Obama's policy of retrenchment in the Middle East other actors such as the UK will attempt to fill the void. Within this context Gareth Stansfield, Doug Stokes and Saul Kelly in their article analyze the UK's return to the region and its implication for the balance of power in the region. Vladimir Bobrovnikov brings attention to the making of the intolerant discourse on Islam in Soviet and Imperial Russia and the attempts to integrate applied Oriental studies into the general debates on Orientalism. Written by Emrah Kekilli the last commentary focuses on the ongoing Libya crisis and its forthcoming elections. Placing the main fault upon UAE's intervention Kekilli contends that the crisis in Libya reflects the regional interests. With one more year coming to an end we are pleased to present to our readers another insightful issue which aims to bring attention to the largely ignored region of Central Asia. Furthermore the latest transformations in Turkey deserve to be analyzed thoroughly and presented to those readers interested in Turkey's politics. With the trust that you will find this issue illuminating and interesting we look forward to meeting you in the next year's issues.

United States Code
United States, 2013. The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926 and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established *prima facie* the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947 Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code on a title by title basis into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office.

Committee,2014-07-03 15 million NHS patients in England with long term conditions such as diabetes arthritis and asthma account for 70% of the annual expenditure of the NHS in England One projection estimating that the bill for treatment of long term conditions will require the NHS to find 4 billion more each year by 2016 Increasingly patients do not have a single long term condition but live with two or more conditions complicating treatment and adding to its cost The Committee strongly supports the development of individual care planning for people with long term conditions based on the principles successfully demonstrated in the NHS House of Care programme Care planning approaches will involve GPs community health services and specialists sitting down with the patient to draw up a personalised plan for the care required which includes the support needed to help the patient manage his or her own condition The challenge though of introducing personalised care planning for 15 million people is substantial The Committee looked at the prevailing view that services to treat long term conditions should be moved out of hospitals and into primary and community care To provide effective care for these conditions services have to be maintained across all settings from support in the home through to acute specialist care and many conditions will continue to require specialist services delivered in hospital Effective management of long term conditions also requires collaboration with other government providers such as housing and transport services
