**HC 327 - Funding for disadvantaged pupils** Great Britain. Parliament. House of Commons. Committee of Public Accounts, 2015 Since the introduction of the Pupil Premium in 2011 there is some evidence that the attainment gap between disadvantaged pupils and their peers has started to narrow Head teachers have increased their focus on tackling this obdurate issue and there are many examples of schools using the Pupil Premium on interventions that work The work of the Education Endowment Foundation has also been important in

developing the evidence base for what works best and so helping schools to choose the best interventions for their own circumstances However the Department for Education needs to be better at supporting schools to share and use best practice more consistently so that more schools use the Pupil Premium effectively In addition there remain inequalities in the core funding received by schools with very similar levels of disadvantage As the impact of the Pupil Premium will take a long time to be fully realised the Department needs to do more to demonstrate its emerging benefits in the meantime We also urge the Department to carry out an early review of the effectiveness of the Early Years Pupil Premium

Rethinking Class Size: The complex story of impact on teaching and learning Peter Blatchford, Anthony Russell, 2020-11-12 The debate over whether class size matters for teaching and learning is one of the most enduring and aggressive in education research Teachers often insist that small classes benefit their work But many experts argue that evidence from research shows class size has little impact on pupil outcomes so does not matter and this dominant view has informed policymaking internationally Here the lead researchers on the world's biggest study into class size effects present a counter argument Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers experience and conclude that class size matters very much indeed Drawing on 20 years of systematic classroom observations surveys of practitioners detailed case studies and extensive reviews of research Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided While class size may have no direct effect on pupil outcomes it has they say significant force through interconnections with classroom processes In describing these connections the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere It impacts on teaching grouping practices and classroom management the quality of peer relations tasks given to pupils and on the time teachers have for marking assessments and understanding the strengths and challenges for individual pupils From their analysis the authors develop a new social pedagogical model of how class size influences work and identify policy conclusions and implications for teachers and schools

Understanding Emotions in Mathematical Thinking and Learning Ulises Xolocotzin, 2017-05-12 Emotions play a critical role in mathematical cognition and learning Understanding Emotions in Mathematical Thinking and Learning offers a multidisciplinary approach to the role of emotions in numerical cognition mathematics education learning sciences and affective sciences It addresses ways in which emotions relate to cognitive processes involved in learning and doing mathematics including processing of numerical and physical magnitudes e.g. time and space performance in arithmetic and algebra problem solving and reasoning attitudes learning technologies and mathematics achievement Additionally it covers social and affective issues such as identity and attitudes toward mathematics Covers methodologies in studying emotion in mathematical knowledge Reflects the diverse and innovative nature of the methodological approaches and theoretical frameworks proposed by current

investigations of emotions and mathematical cognition Includes perspectives from cognitive experimental psychology neuroscience and from sociocultural semiotic and discursive approaches Explores the role of anxiety in mathematical learning Synthesizes unifies the work of multiple sub disciplines in one place *HC 557 - Adult Literacy and Numeracy* Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee, 2014-09-08 In light of an OECD survey of 24 countries ranking England and Northern Ireland 22nd for literacy and 21st for numeracy a more joined up Government approach is needed to tackle the alarmingly low levels of adult literacy and numeracy While the Government pledges free training and tuition for any adult who wishes to study English and maths up to and including GCSE level adults with the most limited skills were not aware of the support available There is little rigorous or uniform assessment in place for when adults claim unemployment benefit despite the fact that this is an ideal opportunity to help adults to gain essential skills needed to get a job The Department for Work and Pensions the Department for Business Innovation and Skills and Jobcentre Plus and skills providers should work closely to ensure there is consistent and thorough assessment of skills at the earliest possible stage of unemployment benefit claims The Committee urges a more flexible approach to adult learning both in the types of programme on offer and in the types of funding given by the Government There is also concern about reductions in funding to adult learning schemes and the Government is advised to reverse its decision to cut funding to Unionlearn a scheme which has achieved outstanding results at a fraction of the cost of full time formal education The Government should also move away from its preoccupation with GCSEs as the gold standard of measurement for adult skills as less linear and traditional learning schemes are often more effective **The Realities and Futures of Work** David Peetz, 2019-09-27 What do we know about the current realities of work and its likely futures What choices must we make and how will they affect those futures Many books about the future of work start by talking about the latest technology and focus on how technology is going to change the way we work And there is no doubt that technology will have huge impacts However to really understand the direction in which work is going and the impact that technology and other forces will have we need to first understand where we are This book covers topics ranging from the mega drivers of change at work power globalisation and financialisation to management workers digitalisation the gig economy gender climate change regulation and deregulation In doing this it refers to some of the great works of science fiction It demolishes several myths such as that the employment relationship is doomed that we are all heading to becoming freelancers or gig workers one day that most jobs will be destroyed by technological change that the growth in jobs will mainly be in STEM fields that we will no longer value collectivism as we will all be individuals or that the death of unionism is inevitable *The Realities and Futures of Work* also rejects the idea of technological determinism that whatever will be will be thanks to technological change and so it refuses to accept that we simply need to prepare to adapt ourselves to the future by judicious training since there is nothing else we can do about it Instead this book provides a realistic basis for thinking about both the present and the future It

emphasises the choices we make and the implications of those choices for the future of work      Much Promise: Successful Schools in England Barnaby Lenon, 2017-04-24 Barnaby Lenon a former schoolmaster and headmaster who is chair of the Independent Schools Council takes an in depth look at the elements that make up a successful school He examines leading and latest research on school leadership and management looks at how teachers pupils parents and governors can achieve results and puts the spotlight on subjects exam systems and social mobility For his research he visited a number of schools that are achieving outstanding results John Perryn Primary School Acton Tollgate Primary School Newham King Solomon Academy Marylebone Burlington Danes Academy Hammersmith West London Free School Hammersmith Michaela Community School Wembley St Mary Magdalene Academy Islington Dixons Kings Academy Bradford Tauheedul Boys School Blackburn London Academy of Excellence Newham and Brighton College His analysis of their innovations and achievements provides an insight into some of England s most successful schools      The Tablet , 2004 The international Catholic weekly
