The Development of Criminal and Antisocial Behavior Julien Morizot, Lila Kazemian, 2014-12-02. This edited book summarizes the current state of knowledge on the development of criminal and antisocial behavior over the life course. It focuses mainly on the developmental perspective which has had a paradigmatic influence on current theoretical and empirical works in criminology. With a multidisciplinary perspective, the book reviews: a) the fundamental concepts of developmental criminology; b) the risk factors and developmental processes related to the most salient personal (e.g., genetics, personality) and environmental (e.g., family, peers, school) domains explaining the development of criminal and antisocial behavior; c) the developmental issues related to a number of special themes (e.g., women's criminality, street gangs); and d) the applied and policy implications of research in developmental criminology. In each chapter, prominent researchers from different disciplines such as criminology and psychology summarize the state of knowledge on a specific topic, identify the shortcomings of past research, offer recommendations for future research needs.

Exotic Nuclei (IASEN-2013) - Proceedings Of The First International African Symposium On Exotic Nuclei Yuri Erastovich Penionzhkevich, Evgeni A. Cherepanov, Dmitri Kamanin, Robert Bark, John Christopher Cornell, 2014-11-20. This book is a collection of talks presented at the First International African Symposium on Exotic Nuclei (IASEN 2013). The symposium was held at Cape Town, South Africa, from 2-6 December 2013. The IASEN 2013 was dedicated to the problems of producing and investigating nuclei far from the line of stability. The symposium was organized by two scientific centers: iThemba LABS, South Africa, and the Joint Institute for Nuclear Research, Dubna. The main goal of the Symposium was to discuss the latest results on the production and study of the properties of the lightest to heaviest nuclei, as well as the plans for future joint investigations in the field of exotic nuclei. The talks were presented by the leading scientists in the field. Among the topics of the symposium were the following: production and study of properties of nuclei in extreme states (strongly deformed nuclei, highly excited nuclei, nuclei far from the line of stability, as well as nuclei having large angular momenta). New results of the investigations are presented in this book. In particular, the latest results on the synthesis of new superheavy elements are also presented. At the Symposium, there were talks devoted to existing detecting devices and accelerators of exotic nuclei, as well as to the future projects for the creation of similar set-ups.

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28. Complex problem solving (CPS) and related topics such as dynamic decision making (DDM) and complex dynamic control (CDC) represent multifaceted psychological phenomena. In a broad sense, CPS encompasses learning, decision making, and acting in complex

and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
