## UNIT 4.6: The Moon: Features of the Moon

### Definitions

- **lunar**
  - something relating to the Moon
- **satellite**
  - a moon or other object in space that orbits a planet
- **crater**
  - bowl-shaped dent in a surface

### A ball of rock that orbits the Earth

- The Moon is a ball-shaped rock that orbits the Earth.
- The Moon = Earth's only natural satellite.
- A satellite is a small object that orbits a planet.
- The Moon is closer to the Earth than the Sun or any other planet.

The Moon has no living things because there is:

### Moon rotation

- The same side of the Moon is always facing the Earth. Why?
- The Moon rotates on its own axis every 27.3 days.
- It takes the Moon 27.3 days to orbit the Earth.
- The side we see is lit by reflected sunlight.
- The Moon rotates around on its own axis in the same time it takes to orbit Earth.
- That is why we only ever see the one side of the Moon.

27.3 days to rotate on own axis

27.3 days to orbit the Earth.

### The surface of the Moon

- The surface of the Moon is dry and rocky.
- The surface of the Moon is covered in large dents, called craters.
- These were caused by meteorites hitting the Moon.

Humans have done a lot of research about the Moon and have even walked on it!

## Scope For Natural Science Term 4 2014:

Dawkins' God Alister E. McGrath, 2015-01-20 A fully updated new edition of a critically acclaimed examination of the theories and writings of Richard Dawkins by a world renowned expert on the relation of science and religion Includes in depth analysis of Dawkins landmark treatise *The God Delusion* 2006 as well as coverage of his later popular works *The Magic of Reality* 2011 and *The Greatest Show on Earth* 2011 and a new chapter on Dawkins as a popularizer of science Tackles Dawkins hostile and controversial views on religion and examine the religious implications of his scientific ideas including a comprehensive investigation of the selfish gene Written in an accessible and engaging style that will appeal to anyone interested in better understanding the interplay between science and religion *Multilevel Selection and the Theory of Evolution* Ciprian Jeler, 2018-06-07 This book puts multilevel selection theory into a much needed historical perspective This is achieved by discussing multilevel selection in the first half of the twentieth century the reasons for the energetic rejection of Wynne Edwards group selectionist stance in the 1960s Elisabeth Lloyd s contribution to the units of selection debate Price s hierarchical equation and its possible interpretations and finally species selection in macroevolutionary contexts Another idea also seems to emerge from these studies namely that perhaps a more sure footed position for multilevel selection theory would be acquired if we were to show a renewed interest in old group selection i e in scenarios in which the differential reproduction of the groups themselves affects the frequencies of either individual level or group level traits This book will be of interest to philosophers and historians of biology as well as to theoretically inclined biologists who have an interest in multilevel selection theory UNESCO science report UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North South divide in research and innovation This is one of the key findings of the UNESCO Science Report towards 2030 A large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge Most research and development R D is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report For many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years Among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries Written by more than 50 experts who are each covering the country or region from which they hail the UNESCO Science Report towards 2030 provides more country level information than ever before The trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could

orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come

**Nursing Theory, Postmodernism, Post-structuralism, and Foucault** Olga Petrovskaya, 2022-09-30 Nursing Theory Postmodernism Post structuralism and Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject In Nursing Theory Postmodernism Post structuralism and Foucault Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge American nursing theory are rendered meaningless In contrast other nurse scholars from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice The book showcases examples of their intelligent creative theorizing Arguing that American nursing theory enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
