State Capitalism Joshua Kurlantzick, 2016 The end of the Cold War ushered in an age of American triumphalism best characterized by the Washington Consensus the idea that free markets democratic institutions limitations on government involvement in the economy and the rule of law were the foundations of prosperity and stability The last fifteen years starting with the Asian financial crisis have seen the gradual erosion of that consensus Many commentators have pointed to the emergence of a powerful new rival model state capitalism In state capitalist regimes the government typically owns firms in strategic industries Not beholden to private sector shareholders such firms are allowed to operate with razor thin margins if the state

deems them strategically important China soon to be the world's largest economy is the best known state capitalist regime but it is hardly the only one In State Capitalism Joshua Kurlantzick ranges across the world China Thailand Brazil Russia South Africa Turkey and more and argues that the increase in state capitalism across the globe has on balance contributed to a decline in democracy He isolates some of the reasons for state capitalism's resurgence the fact that globalization favors economies of scale in the most critical industries and the widespread rejection of the Washington Consensus in the face of the problems that have plagued the world economy in recent years That said a number of democratic nations have embraced state capitalism and in those regimes state backed firms like Brazil's Embraer have enjoyed considerable success Kurlantzick highlights the mixed record and the evolving nature of the model yet he is more concerned about the negative effects of state capitalism When states control firms whether in democratic or authoritarian regimes the government increases its advantage over the rest of society The combination of new technologies the perceived failures of liberal economics and democracy in many developing nations the rise of modern kinds of authoritarians and the success of some of the best known state capitalists have created an era ripe for state intervention State Capitalism offers the sharpest analysis yet of what state capitalism's emergence means for democratic politics around the world *Europe's Growth Challenge* Anders

approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject
