Big Data and Competition Law Alptekin Koksall, 2023-11-13 Recent studies on competition law and digital markets reveal that accumulating personal information through data collection and acquisition methods benefits consumers considerably Free of charge fast and personalised services and products are offered to consumers online Collected data is now an indispensable part of online businesses to the point that a new economy a data driven sector has emerged Many markets such as the social network search engine online advertising and e commerce are regarded as data driven markets in which the utilisation of Big Data is a requisite for the success of operations However the accumulation and use of data brings competition law concerns as they contribute to market power in the online world resulting in a few technology giants gaining unprecedented market power due to the Big Data accumulation indirect network effects and the creation of online ecosystems As technology giants have billions of consumers worldwide data driven markets are truly global In these data driven markets technology giants abuse their dominant positions but existing competition law tools seem ineffective in addressing market power and assessing abusive behaviour related to Big Data This book argues that a novel approach to the data driven sector must be developed through the application of competition law rules to address this It argues that current and potential conflicts can be mitigated by extending the competition law assessment beyond the current competition law tools to offer a modernised and unified approach to the Big Data related competition issues Promoting new legal tests for addressing the market power of technology giants and assessing abusive behaviour in data driven markets this book advocates for cooperation between competition and data protection authorities It will be of interest to students academics and practitioners with an interest in competition law and data protection

Handbook of Cultural Economics, Third Edition Ruth Towse, Trilce Navarrete Hernández, 2020-03-28 Cultural economics has become well established as a subject of interest for students and teachers of courses ranging from economics to arts administration as well as for policy makers and practitioners in the creative industries Digitisation has had a tremendous impact on many areas of the creative economy and the third edition of this popular book fully reflects it

The Nobel Factor Avner Offer, Gabriel Söderberg, 2019-11-19 Economic theory may be speculative but its impact is powerful and real Since the 1970s it has been closely associated with a sweeping change around the world the market turn This is what Avner Offer and Gabriel Soderberg call the rise of market liberalism a movement that seeking to replace social democracy holds up buying and selling as the norm for human relations and society Our confidence in markets comes from economics and our confidence in economics is underpinned by the Nobel Prize in Economics which was first awarded in 1969 Was it a coincidence that the market turn and the prize began at the same time The Nobel Factor the first book to describe the origins and power of the most important prize in economics explores this and related questions by examining the history of the prize the history of economics since the prize began and the simultaneous struggle between market liberals and social democrats in Sweden Europe and the United States The Nobel Factor tells how the prize created by the Swedish central bank emerged from a conflict between central bank orthodoxy and social democracy The aim was to use the halo of the Nobel brand to enhance central bank authority and the prestige of market friendly economics in order to influence the future of Sweden and the rest of the developed world And this strategy has worked with sometimes disastrous results for societies striving to cope with the requirements of economic theory and deregulated markets
