Exam in English Examcart Experts, **Japanese Psycholinguistics** Joseph F. Kess, Tadao Miyamoto, 1994-01-01 This classified and annotated research bibliography is meant to serve as an introduction to the rich field of Japanese psycholinguistics by providing an exhaustive inventory of what has been done in or about Japanese in a psycholinguistic sense. Thus this volume captures the tradition of psycholinguistic research currently being pursued in Japan, its history and development over the past thirty years, and its current directions and research themes, as well as international research in modern psycholinguistics which targets the Japanese language as the focal point of empirical procedures or deductive analysis in psychology, linguistics, psycholinguistics, and cognitive science. The bibliography supports a broad view of psycholinguistics, acknowledging that psycholinguistic research in how natural language is learned, produced, comprehended, stored, and recalled now reaches beyond its traditional roots in the two disciplines of psychology and linguistics. The interested scholar will thus find entries from the traditional core of psycholinguistic research on natural language, as well as entries from related areas which have either influenced or been influenced by psycholinguistic work on Japanese. Every article, text, and edited volume listed in the bibliography is available through normal library channels and is thus accessible to the scholar interested in what psycholinguistic research has been done in or on the Japanese language in Japan and internationally. The annotations for each entry have been especially written for this bibliographic inventory, and with the linguist, psychologist, and psycholinguist specifically in mind. The authors' intention is to maximize the usefulness of such an inventory by preparing annotations for the interested reader who wishes to know not only what the article contains but where it fits in the research tradition.
