Kindergarten Alignment	These pre-K studies will provide important foundational knowledge for students and support their growing understanding of self and the world around them.		
	This pre-K theme occurs simultaneously to the Kindergarten (K) social studies unit on <b>School and Community</b> . It will introduce children to the practices of studying themselves and others, which lay the foundation for the Kindergarten unit <b>Self and Others</b> . In this theme, children begin seeing themselves as critical thinkers and observers of the environment and people around them, practicing key science skills that they will use in future pre-K and Kindergarten science-based units.	This pre-K theme will add depth to children's study of themselves which aligns with the Kindergarten social studies unit of <b>Self and Others</b> . Additionally, children will experience content that supports the K unit <b>Geography, People and the Environment</b> . Science content aligns to the K unit on light and water ( <b>Trees Through the Seasons</b> as well as <b>Exploring Properties</b> ).	In studying Plants and Babies, pre-K students will continue to learn about the physical environment (aligns to the K social studies unit <b>Geography, People and the Environment</b> as well as the Science unit on <b>Exploring Properties</b> ). The study of transformation supports important concepts that are addressed while studying change in K (social studies unit <b>Families, Change and Time</b> ). Also science content aligns to K units on plants and the environment ( <b>Trees Through the Seasons</b> ) and living things ( <b>Animals</b> ).

**Learning Technologies** Mesut Duran, 2022-10-19 With a historical context covering the past 20 years, this book provides in-depth discussions of research trends and issues related to learning technologies in K-12 schools, higher education settings, and educational administration in the U.S. Given the remote learning challenges and opportunities that the COVID-19 pandemic has recently brought to our attention, world-wide interest in educational technology-related issues is at its peak. Therefore, this book is specifically directed at the entire educational technology field: educators, educational leaders, researchers, and policymakers alike who are interested in learning technologies in the U.S. educational system. Three main resources guide the discussions in the book. First, an extensive literature review related to the book's central focus, learning technologies in the U.S. education system, including relevant studies published over the last two decades, is presented. Second, reflections on the author's twenty years of professional teaching, research, and scholarship focused on educational technology at a major U.S. research university are provided. And third, the viewpoints of students in the graduate-level educational technology courses taught by the author, presenting the vital perspective of practicing teachers and educational leaders regarding how learning technologies affect their schools and their work within them, are considered. All of these perspectives and data combine to provide a comprehensive overview on the topic of learning technologies in the U.S. education system. Together, they create a book that is indispensable for anyone interested in learning technologies in education.

[An Occupational Therapy Practitioner's Guide to School-Based Practice](#) Karel L. Dokken, John S. Luna, Susan E. Still, 2024-08-19 Using a practical nuts and bolts approach to school-based occupational therapy services, this unique text guides both entry-level and experienced practitioners through the evaluation, intervention, and dismissal process in an educational setting.
