Trouble Every Day Kate Robertson,2021-06-15 Transgressive both in its narrative and in its filmmaking Trouble Every Day 2001 envisions the monster inside unspeakable urges and an overwhelming need for complete incorporation A plant discovered in the South American jungle produces in its test subjects a terrible unnatural and uncontrollable hunger Vicious all consuming desire begets excessive violence and a turn to cannibalism which situates Trouble Every Day into a tradition of

challenging cinema a film maudit that pushes the boundaries of what can be shown on screen But while it is certainly an unflinching film it is deserving of reassessment as part of Clare Denis filmography as well as a broader cinematic lineage Focusing on close textual analysis this book delves into the surfeit of visual literary and non fiction references that shape Trouble Every Day while thwarting attempts to firmly situate it It considers its place in a lineage of films that push the boundary of taste and representation aligned as much with Un Chien Andalou 1929 as the New French Extremity It also considers the film's relationship to such sub genres as classic monster movies video nasties mad science gothic vampire body horror and Italo exploitation cannibal films and directors such as Abel Ferrara Brian de Palma Jean Renoir and Jacques Tourneau Drawing on a range of disciplines including art philosophy and phenomenology this study explores how Trouble Every Day elicits a visceral response to a cinematic experience that beguiles and violates

Big and Bright David S. Evans, J. Derral Mulholland, 2013-09-13 By day every year over 40 000 visitors pour in Across the Rio Grande a hundred miles away Mexican mountaineers use the white domes as landmarks By night perched almost 7 000 feet above the sleeping earthbound world astronomers probe the secrets of the night sky This is the University of Texas McDonald Observatory one of the world's largest university operated astronomical installations Big and

Bright A History of the McDonald Observatory is the story of a remarkable collaboration between two major universities one a prestigious private school the other a growing southwestern state institution The University of Chicago had astronomers but its Yerkes Observatory was aging and underfunded the University of Texas had money for an observatory but no working astronomer to staff it Out of their mutual need they formed a thirty year compact for a joint venture Unusual in its day the Yerkes McDonald connection presaged the future In this arrangement one can see some of the beginnings of today s consortium big science Now the McDonald Observatory s early history can be put in proper perspective Blessed with a gifted and driving founding director the world s then second largest telescope and an isolation that permitted it to be virtually the only major astronomical observatory that continued operations throughout World War II the staff of McDonald Observatory helped lay the foundations of modern astrophysics during the 1940s For over a decade after the war a lonely mountaintop in West Texas was the mecca that drew nearly all the most important astronomers from all over the world Based on personal reminiscences and archival material as well as published historical sources Big and Bright is one of the few histories of a major observatory unique in its focus on the human side of the story Catalog of Copyright Entries. Third Series Library of Congress. Technology and the Making of Experimental Film Culture John Powers,2023 The Bolex camera 16mm reversal film stocks commercial film laboratories and low budget optical printers were the small gauge media technologies that provided the infrastructure for experimental filmmaking at the height of its cultural impact Technology and the Making of Experimental Film Culture examines how the avant garde embraced these material resources and invested them with meanings and values adjacent to those of semiprofessional film culture By reasserting the physicality of the body in making time lapse and kinesthetic sequences with the Bolex filmmakers conversed with other art forms and integrated broader spheres of humanistic and scientific inquiry into their artistic process Drawing from the photographic qualities of stocks such as Tri X and Kodachrome they discovered pliant metaphors that allowed them to connect their artistic practice to metaphysics spiritualism and Hollywood excess By framing film labs as mystical or adversarial they cultivated an oppositionality that valorized control over the artistic process And by using the optical printer as a tool for excavating latent meaning out of found footage they posited the reworking of images as fundamental to the exploration of personal and cultural identity Providing a wealth of new detail about the making of canonized avant garde classics by such luminaries as Carolee Schneemann Jack Smith and Stan Brakhage as well as rediscovering works from overlooked artists such as Chick Strand Amy Halpern and Gunvor Nelson Technology and the Making of Experimental Film Culture uses technology as a lens for examining the process of making where ideas come from how they are put into practice and how arguments about those ideas foster cultural and artistic commitments and communities
