Greg J. Duncan,Richard J. Murnane,2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a
meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports
can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent
research on inequality and its effects on families children and schools They describe the interplay of social and economic
factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening
wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are
transforming the lives of low income children from prekindergarten through high school All of these programs are research
tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision
of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for
education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of
education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished
