**An Age of Accountability** John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

**Resisting Neoliberalism in Education** Lyn Tett,Mary Hamilton,2019-08-28  
Neoliberalism has been widely criticised because of its role in prioritising free markets as the optimum way of solving problems and organising society In the field of education this leads to an emphasis on the knowledge economy that can reduce both persons and education to economic actors and be detrimental to wider social and ethical goals Drawing on a range of international contexts across informal adult school and university settings this book provides innovative examples that show how neoliberalism in education can be challenged and changed at the local national and transnational levels in order to foster a more democratic culture
