Middlebrow Cinema Sally Faulkner, 2016-03-31 Middlebrow Cinema challenges an often uninterrogated hostility to middlebrow culture that frequently dismisses it as conservative which it often is not and feminized or middle class which it often is. The volume defines the term relationally against shifting concepts of high and low and considers its deployment in connection with text, audience and institution. In exploring the concept of the middlebrow, this book recovers films that were widely meaningful to contemporary audiences yet sometimes overlooked by critics interested in popular and arthouse extremes. It also addresses the question of socially mobile audiences who might express their aspirations through film watching and traces the cultural consequences of the movement of films across borders and between institutions. The first study of its kind, the volume comprises 11 original essays that test the purchase of the term middlebrow across cultures including those of Europe, Asia and the Americas from the 1930s to the present day. Middlebrow Cinema brings into view a popular and aspirational and thus especially relevant and dynamic area of film and film culture. Ideal for students and researchers in this area, this book remaps popular and arthouse approaches, explores British, Chinese, French, Indian, Mexican, Spanish national cinemas alongside Continental Hollywood, queer transnational cinemas, analyses biopic, heritage, historical film, melodrama, musical, sex comedy genres.

The Report: Oman 2016 Oxford Business Group, 2016-01-12 Oman's GDP grew 4.6% between 2013 and 2014 according to the Oman Central Bank, with hydrocarbons the main driver of the economy at almost 50% of GDP. Although the dip in oil prices has put pressure on government revenues, authorities are pressing ahead with spending plans for the sector, particularly in the downstream segment. The country's infrastructure expansion plans are also moving forward, particularly at the country's three ports as the country seeks to leverage its strategic position on the Strait of Hormuz and establish itself as a global transport and logistics hub. Feeding off this development drive are the sultanate's banks, with project finance regarded as one of the most promising areas for lending growth. In the longer term, Oman Vision 2020 seeks to boost private sector participation in the economy and fuel SME growth in key sectors including construction, retail, tourism and transport.

The Seven Secrets of Germany David B. Audretsch, Erik Lehmann, 2016 Europe and much of the developed world have been bogged down by stagnant economic growth and alarmingly high rates of unemployment. But not Germany. This book reveals seven key aspects of the German economy and society that have provided considerable buoyance in an era of global turbulence.

Shape-Shifting Capital George González,2015-05-20 Shape Shifting Capital Spiritual Management Critical Theory and the Ethnographic Project is positioned at the intersection of anthropology critical theory and philosophy of religion First Gonz lez explores the phenomena of workplace spirituality in a language that is accessible to a general readership Taking contemporary trends in organizational management as a case study he argues by way of a detailed ethnographic study of practitioners of workplace spirituality that the conceptual and institutional boundaries between religion science and capitalism are being redrawn by theologized management appropriations of tropes borrowed from creativity theory and quantum mechanics Second Gonz lez makes a case for a critical anthropology of religion that combines existential concerns for biography and intentionality with poststructuralist concerns for power arguing that the ways in which the personalization of metaphor bridges personal and social histories also helps bring about broader epistemic shifts in society Finally in a postsecular age in which capitalism itself is explicitly and confidently spiritual Gonz lez suggests that it is imperative to reorient our critical energies towards a present day evaluation of postmodern capitalism s boundary blurring Gonz lez further argues that the kind of existential deconstruction performed by what he calls existential archeology can serve the needs of any social criticism of neoliberal religion and corporate spirituality
