Oliga,2007-08-20 One of the great challenges we face today is coming to grips with forces of power in both theoretical and methodological terms in a way that prepares us for action action that is not totally subject to existing forces The literature has some excellent theoretical accounts of power but these say little about what we should do Most often they are abstract and out of reach of all but a select few In this book however we have a clear cut account of power ideology and control that paves the way for practic minded people to make a genuine attempt at tackling issues of power on both organizational and societal levels John C Oliga suggests a division between what he calls objectivist subjectivist and relational perspectives With objectivism he refers to theories that focus on power as capacities located in social structures These tend to be either synergistic e g Parsonian collective or conflictual e g Marxian conflictual view theoretical orientations With subjectivism he discusses theories that focus on power possessed by agents With rela tional approaches he places theories that conceive power as a property of interaction among social forces      *The Origins and Diversity of Axial Age Civilizations* Shmuel N. characteristics of professionals 1 deliberating on the complexity of practice and workplace cultures and environments 2 understanding what is probable possible and impossible in relation to existing and changing practices 3 taking a deliberate stance in positioning oneself in practice as well as in making technical decisions and 4 being aware of and responsible for the consequences of actions taken or actions not taken in relation to the doing saying knowing and relating in practice Educating the deliberate professional is a comprehensive volume that carves out and explores a framework for a pedagogy of deliberateness that goes beyond educating reflective and deliberative practitioners As a whole this book argues for the importance of educating deliberate professionals because in the current higher education climate there is a need to reconcile critique thinking participation doing and moral responsibility relating to others in professional practice and professional education

**A Different Perspective**

Charles E. Shaw, 2007-06-21 It is understood that the first recorded history of slavery had its beginning in the United States in 1619 when approximately twenty Africans were brought by a Dutch soldier and sold to the English colony of Jamestown Virginia as indentured servants The transformation from indentured servitude to racial slavery happened gradually It wasnt until 1661 that a reference to slavery entered in Virginia law directed at Caucasian servants who ran away with a black servant It wouldnt be until the Slave Codes of 1705 that the status of African Americans as slaves would be sealed This would last for another 160 years until after the end of the American Civil War with the ratification of the 13th Amendment in December 1865 However it must be noted that the first imported Africans were brought as indentured servants not slaves They were required as white indentured servants to serve nine years Many were brought to the British North American colonies specifically Jamestown Virginia in 1620 It is most interesting to make note of the fact that slavery was subsequently legalized in the following states 1641 Massachusetts becomes the first colony to legalize slavery 1650 Connecticut legalizes slavery 1661 Virginia officially recognizes slavery by statute 1662 A Virginia statute declares that children born would have the same status as their mother 1663 Maryland legalizes slavery 1664 Slavery is legalized in New York and New Jersey The shift from indentured servants to African slaves

was prompted by a dwindling class of former servants who had worked through the terms of their indentures and thus became competitors to their former masters These newly freed servants were rarely able to support themselves comfortably and the tobacco industry was increasingly dominated by large planters This caused domestic unrest culminating in Bacon's Rebellion Eventually chattel slavery became the norm in regions dominated by plantations that were owned by Englishmen who lived in Great Britain where the British courts had made a series of contradictory rulings on the legality of slavery which encouraged several thousand slaves to flee the newly independent United States as refugees along with the retreating British in 1783

**Critical Thinking and Epistemic Injustice** Alessia Marabini, 2022-03-22 This book argues that the mainstream view and practice of critical thinking in education mirrors a reductive and reified conception of competences that ultimately leads to forms of epistemic injustice in assessment It defends an alternative view of critical thinking as a competence that is normative in nature rather than reified and reductive This book contends that critical thinking competence should be at the heart of learning how to learn but that much depends on how we understand critical thinking It defends an alternative view of critical thinking as a competence that is normative in nature rather than reified and reductive The book draws from a conception of human reasoning and rationality that focuses on belief revision and is interwoven with a Bildung approach to teaching and learning it emphasises the relevance of knowledge and experience in making inferences The book is an enhanced English version of the Italian monograph *Epistemologia dell' Educazione Pensiero Critico Etica ed Epistemic Injustice*

**Liberalism, Diversity and Domination** Inder S. Marwah, 2019-05-23 Examines how distinctive liberalisms respond to racial cultural gender based and class based forms of diversity and difference

**What is Orientation in Global Thinking?** Katrin Flikschuh, 2017-10-05 Uses Kant's philosophical method to show how global justice theories depend on acknowledgement of the intelligibility of contextually alien thought

**Straw Man Arguments** Scott Aikin, John Casey, 2023-08-24 This book analyses the straw man fallacy and its deployment in philosophical reasoning While commonly invoked in both academic dialogue and public discourse it has not until now received the attention it deserves as a rhetorical device Scott Aikin and John Casey propose that straw manning essentially consists in expressing distorted representations of one's critical interlocutor To this end the straw man comprises three dialectical forms and not only the one that is usually suggested the straw man the weak man and the hollow man Moreover they demonstrate that straw manning is unique among fallacies as it has no particular logical form in itself because it is an instance of inappropriate meta argument or argument about arguments They discuss the importance of the onlooking audience to the successful deployment of the straw man reasoning that the existence of an audience complicates the dialectical boundaries of argument Providing a lively provocative and thorough analysis of the straw man fallacy this book will appeal to postgraduates and researchers alike working in a range of fields including fallacies rhetoric argumentation theory and informal logic
