Paper Helicopters

Materials

Paper Helicopter Templates (large and small – printed on regular paper)
Paper clips
Clothespins (plastic or wood)
Scissors

Key Question

What affects how long paper helicopters stay in the air?

Learning Objectives

Children will....

- make paper helicopters and play with them.
- explore how changing the paper helicopters impacts how long they stay in the air.
- compare different paper helicopter designs by letting them race down from an elevated location like the top of stairs, a balcony, or on top of playground equipment (if available).

Vocabulary (See What the heck? Explanation of Science at the end for definitions.)
Helicopter
Blades

SAFETY CONCERNS

 Throwing the paper helicopters and collecting them can be a bit chaotic. Make sure there is plenty of room and perhaps make a rule that the young aerospace engineers need to walk to collect their helicopters after they land.

STEMAZing Teaching Philosophy

Children should always be given ample time to experiment, notice, and wonder before they are provided an explanation.

Always engage children with our two favorite questions:

What do you notice? What do you wonder?

Resist the urge to answer any questions children have while exploring. Instead, respond back with questions to children and let them make sense of the world. Sample questions you might use: What do you think? Do you notice any patterns? What could we change? Can we test something else? What can we try next? If children ask a testable question, which they could answer by doing an experiment, talk through with them how they might design a test to help answer their question. As much as possible and within reason, let them actually test their questions by trying the experiments they propose.
