people They left on this different ship not because everyone couldn't fit in the same ship but because they believed they were superior to the Newtonians and no longer wanted to associate with them Those wonderfully misguided people were called Brenians What do you suppose the chances are that Kirk and his friends would travel through a random wormhole and end up in the same galaxy as the Brenians Four months into their journey home they crash land on a planet and soon find themselves caught up in a quest to wake a sleeping beauty from stasis in exchange for a replacement part for their ship During their quest Kirk is captured by the Brenian people only to escape with the prince's fiancé Somehow somehow our heroes must stop a war before they all end up dead
