THE SUNFLOWER FOREST

ECOLOGICAL RESTORATION AND THE NEW COMMUNION WITH NATURE

"Ecological restoration is one of today's most constructive, hopeful, and provocative environmental movements, and William Jordan III is its leading visionary."

MICHAEL POLLAN, author of The Botany of Desire

The Sunflower Forest

William R. Jordan

The Sunflower Forest:

The Sunflower Forest Torey Hayden, 2012-07-10 Bestselling author Torey Hayden's novel poignantly tells of a daughter's attempt to grow up in the shadow of her mother's haunted past. Warm melancholy and evocatively rendered, this book captures the essence of a family touched by sadness. *The Sunflower Forest* Torey L. Hayden, 1984

The Sunflower Forest William R. Jordan, 2003-06 Examines how ecological restoration can reverse environmental damage and conserve forests, prairies, and wetlands. Describes ways to guide damaged ecosystems back to their natural, healthy condition and provides context for the relationship humans have with nature. *The Sunflower Forest* William R. Jordan, 2012-02-07 Ecological restoration, the attempt to guide damaged ecosystems back to a previous, usually healthier or more natural condition, is rapidly gaining recognition as one of the most promising approaches to conservation. In this book, William R. Jordan III, who coined the term restoration ecology and who is widely respected as an intellectual leader in the field, outlines a vision for a restoration-based environmentalism that has emerged from his work over twenty-five years. Drawing on a provocative range of thinkers from anthropologists Victor Turner, Roy Rappaport, and Mary Douglas to literary critics Frederick Turner, Leo Marx, and R. W. B. Lewis, Jordan explores the promise of restoration both as a way of reversing environmental damage and as a context for negotiating our relationship with nature. Exploring restoration not only as a technology but also as an experience and a performing art, Jordan claims that it is the indispensable key to conservation. At the same time, he argues restoration is valuable because it provides a context for confronting the most troubling aspects of our relationship with nature. For this reason, it offers a way past the essentially sentimental idea of nature that environmental thinkers have taken for granted since the time of Emerson and Muir. *Bioregionalism* Michael Vincent McGinnis, 2005-07-28 Bioregionalism is the first book to explain the theoretical and practical dimensions of bioregionalism from an interdisciplinary standpoint, focusing on the place of bioregional identity within global politics. Leading contributors from a broad range of disciplines introduce this exciting new concept as a framework for thinking about indigenous peoples, local knowledge, globalization, science, global environmental issues, modern society, conservation, history, education, and restoration. Bioregionalism's emphasis on place and community radically changes the way we confront human and ecological issues. *Sacred Groves and Local Gods* Eliza F. Kent, 2013-06-20 Drawing on fieldwork conducted in the southern Indian state of Tamil Nadu over seven years, Eliza F. Kent offers a compelling examination of the religious and social context in which south India's sacred groves take on meaning for the villagers who maintain them and shows how they have become objects of fascination and hope for Indian environmentalists. *Exile from Latvia* Harry G. Kapeikis, 2007 Exile from Latvia is the story of a young boy's experiences before, during, and after World War II, told endearingly to touch the heart. Driven from his beloved Latvia by the Soviet Army, Harijs' family flees to Germany in the hope of being captured by the advancing American forces. The family experiences hardships of all kinds: hunger, homelessness, and air raids. They brush with death many times in

many ways and their life is often punctuated with misunderstandings both humorous and tragic Presumed guilty they must prove their innocence The continuous migration causes Harijs to lose friends constantly These experiences shape Harijs life surprisingly in a positive way especially in the Displaced Persons camp under dedicated teachers and scoutmasters There are lighter moments as young Harijs discovers girls often handling the developing attraction in awkward though humorous ways eventually touching the heartstrings of a girl tenderly There is laughter love grief tears and longings of the heart Finally the anticipation of an unexpected future replaces the memories of cruelty atrocity hate betrayal misunderstandings ignorance and fear with commitment to meet the future with confidence During the war years Harijs made friends only to lose them He will not lose you You ll move alongside him through the first person escapades of a pre teen boy looking for answers in a senseless world **The Epworth Herald** ,1896 **First Days of the Year** Hélène Cixous,1998 An inner journey across

space and time linking the author to other poets this lyrical essay poem continues Helene Cixous s rewriting of notions of boundary self other and author Cixous here interrogates the status of the author connecting distant instances of herself with other writers who traverse genders generations and national boundaries First Days of the Year is a celebration of beginnings and future possibilities based on necessity and hope constantly mediating writing and living life and death Like all of Cixous s profoundly original works it seductively leads the reader into a new way of thinking by disrupting fixed ideas of psychic identity subjectivity and language **Walking in the Land of Many Gods** A. James Wohlpart,2013 How are we placed on

Earth What is our relationship to the world around us and how does our thinking affect the way we relate to the world We are entrapped says A James Wohlpart by what Martin Heidegger calls enframing a worldview that considers all objects as mere resources for our use Walking in the Land of Many Gods envisions a new way of thinking about the world one grounded in a moral imagination reconnected to Earth Insightful readings of three contemporary classics of nature writing Janisse Ray s Ecology of a Cracker Childhood Terry Tempest Williams s Refuge An Unnatural History of Family and Place and Linda Hogan s Dwellings A Spiritual History of the Living World are at the heart of Wohlpart s endeavor Powerful and affecting works like these reveal a pathway to a deeper remembering one that reconnects us with the primal forces of creation and acknowledges the sacredness of the world We have forgotten that the world around us is rich and fertile and generative says Wohlpart His exploration of these literary works based on deep anthropology and Native American philosophy opens a pathway into a new way of thinking called sacred reason Founded on interdependence and interrelationship and on care and compassion sacred reason reminds us that divinity exists around us at all times We are invited to walk once again in a land filled with many gods

Human Dimensions of Ecological Restoration Dave Egan,Evan E. Hjerpe,Jesse Abrams,2012-09-26 When it comes to implementing successful ecological restoration projects the social political economic and cultural dimensions are often as important as and sometimes more important than technical or biophysical knowledge Human Dimensions of Ecological Restoration takes an interdisciplinary look at the myriad human aspects of ecological restoration In twenty six chapters

written by experts from around the world it provides practical and theoretical information analysis models and guidelines for optimizing human involvement in restoration projects Six categories of social activities are examined collaboration between land manager and stakeholders ecological economics volunteerism and community based restoration environmental education ecocultural and artistic practices policy and politics For each category the book offers an introductory theoretical chapter followed by multiple case studies each of which focuses on a particular aspect of the category and provides a perspective from within a unique social political cultural setting Human Dimensions of Ecological Restoration delves into the often neglected aspects of ecological restoration that ultimately make the difference between projects that are successfully executed and maintained with the support of informed engaged citizens and those that are unable to advance past the conceptual stage due to misunderstandings or apathy The lessons contained will be valuable to restoration veterans and greenhorns alike scholars and students in a range of fields and individuals who care about restoring their local lands and waters

Growing Stories from India A. Whitney Sanford, 2012-01-01 The costs of industrial agriculture are astonishing in terms of damage to the environment human health animal suffering and social equity and the situation demands that we expand our ecological imagination to meet this crisis In response to growing dissatisfaction with the existing food system farmers and consumers are creating alternate models of production and consumption that are both sustainable and equitable In *Growing Stories from India* Religion and the Fate of Agriculture author A Whitney Sanford uses the story of the deity Balaram and the Yamuna River as a foundation for discussing the global food crisis and illustrating the Hindu origins of agrarian thought By employing narrative as a means of assessing modern agriculture Sanford encourages us to reconsider our relationship with the earth Merely creating new stories is not enough she asserts that each story must lead to changed practices *Growing Stories from India* demonstrates that conventional agribusiness is only one of many options and engages the work of modern agrarian luminaries to explore how alternative agricultural methods can be implemented

Beyond restoration ecology: social perspectives in Latin America and the Caribbean Eliane Ceccon & Daniel Roberto Pérez, 2017-09-05 This book invites us to reflect on the restoration of terrestrial ecosystems in the context of a region whose identity is still under construction Latin America and the Caribbean immersed in a social economic ecological and political crisis whose roots originate historically and politically in colonialism and in the prevailing model of capital accumulation For the first time insights and practical experiences on restoration are gathered from most Latin American and Caribbean countries Furthermore this book offers a social approach to restoration which will likely become preponderant in this field and in this region The authors claim that a Latin American knowledge of restoration is under construction and that this discipline can be a significant tool to empower local populations which might in turn lead to a collective action of change Case studies from 11 countries of the region were compiled involving multiple voices that emerge beyond generalist principles and with a bottom up approach The main idea of the book is to open a debate about the identity of ecological and social restoration in this region This book is targeted to restoration specialists volunteers environmental managers researchers politicians and NGOs working on the complexity of socioecological restoration in a region with unavoidable social problems It is intended for people with similar concerns to those of the chapters authors This work tries to integrate a movement on the rise almost silent born with its own narratives of successes and failures that do not hinder its development Finally the determination and commitment of Latin American and Caribbean social actors to restore not only natural values but also social ethical and cultural ones is remarkable

The American Wilderness Thomas R. Vale, 2005 Interpretations of wild nature and wilderness are particularly diverse in the American mind given our history our collective economic success and our diverse social and cultural mix Although the meanings we attribute to nature reflect our different views of the role humans should play in the natural world there remains a divide between how we embrace protected landscapes and how we consider natural landscapes or nature itself Thomas Vale explores this phenomenon in The American Wilderness Reflections on Nature Protection in the United States In his examination of protected landscapes at all scales from the wooded corners of a city park and the local reserve of wetland to the vast wilderness of the Everglades and Okefenokee to Central Park and Yosemite Vale argues that nature protection is an act of place creation an act that necessarily links humans to nature and depends on a diverse array of human interactions A rare combination of celebration and criticism Vale's argument is twofold landscapes of protected nature in the United States represent a legitimate natural resource and contrary to expressions in some recent literature such landscapes bond people to nature Providing extensive historical and modern data about the national park national wilderness and national wildlife refuge systems Vale argues for the validity of landscape protection and the benefits of achieving both strict preserves and mixed commodity places in a democratic society His goal is to unite the often disparate threads of nature protection into a fabric that will enhance an

appreciation for the extent and richness of nature protection sentiment and action in the United States The Disability Bioethics Reader Joel Michael Reynolds, Christine Wieseler, 2022-05-30 The Disability Bioethics Reader is the first introduction to the field of bioethics presented through the lens of critical disability studies and the philosophy of disability. Introductory and advanced textbooks in bioethics focus almost entirely on issues that disproportionately affect disabled people and that centrally deal with becoming or being disabled. However, such textbooks typically omit critical philosophical reflection on disability. Directly addressing this omission, this volume includes 36 chapters, most appearing here for the first time, that cover key areas pertaining to disability bioethics, such as state of the field analyses of modern medicine, bioethics and disability theory, health, disease, and the philosophy of medicine, issues at the edge and end of life, including physician aid in dying, brain death, and minimally conscious states, enhancement and biomedical technology, invisible disabilities, chronic pain, and chronic illness, implicit bias and epistemic injustice in health care, disability, quality of life, and well-being, race, disability, and healthcare justice, connections between disability theory and aging, trans and fat studies, prenatal testing, abortion, and reproductive justice. The Disability Bioethics Reader, unlike traditional bioethics textbooks, also engages with decades of empirical and theoretical scholarship in disability studies scholarship that spans the social sciences and humanities and gives serious consideration to the history of disability activism.

Aldo Leopold Curt D. Meine, 2010-10-19 This biography of Aldo Leopold follows him from his childhood as a precocious naturalist to his profoundly influential role in the development of conservation and modern environmentalism in the United States. This edition includes a new preface by author Curt Meine and an appreciation by acclaimed Kentucky writer and farmer Wendell Berry. *Research Handbook on Fundamental Concepts of Environmental Law* Douglas Fisher, 2022-11-25 This expanded and updated Research Handbook delivers an authoritative and in-depth guide to the conceptual foundations of environmental law. It offers a nuanced reflection on the underlying principles by exploring issues such as human rights, constitutional rights, sustainable development, and environmental impact assessment within the context of environmental law. *The Republic of Wine* Yan Mo, 2000 A novel of epic proportions, gargantuan appetites, surrealistic fantasies. The Republic of Wine is as daring as it is controversial.

Restored to Earth Gretel Van Wieren, 2013-07-09 Ecological restoration integrates the science and art of repairing ecosystems damaged by human activities. Despite relatively little attention from environmental ethicists, restoration projects continue to gain significance, drawing on citizen volunteers and large amounts of public funds, providing an important model of responding to ecological crisis. Projects range from the massive multi-billion dollar Kissimmee River project restoring 25,000 acres of Everglades wetlands to the 30-million effort to restore selected wetlands in industrial Brownfield sites in Chicago's south side Lake Calumet area to the reintroduction of tall grass prairie ecosystems in various communities in the Midwest. Restored to Earth provides the first comprehensive examination of the religious and ethical dimensions and significance of contemporary restoration practice, an ethical framework that advances the field of environmental ethics in a

more positive action oriented experience based direction Van Wieren brings together insights and examples from restoration ecology environmental ethics religious studies and conservation and Christian thought as well as her own personal experiences in ecological restoration to propose a new restoration ethic grounded in the concrete hands on experience of humans working as partners with the land
