

A close-up, high-contrast image of Sam Fisher, the protagonist of the game. He is a muscular man with a shaved head, wearing a black tactical vest with reflective white stripes over a black t-shirt. He has a serious, intense expression and is looking directly at the viewer. The background is dark and filled with various elements related to the game, including a collage of photos, documents, and a faint image of a man in a suit.

Character-Driven Game Design Petri Lankoski,2011-05 How do game characters contribute to shaping the playing experience What kinds of design tools are available for character based games that utilize methods from dramatic writing and game research Writer Petri Lankoski has a theory for this There is a need to tether character design to game design more tightly than has been the case in the past as well as to pay attention to social networks of characters by the means of finding useful design patterns The use of Lajos Egri s bone structure for a three dimensional character and of Murray Smith s three levels of imaginative engagement with characters allows the candidate to expose the full complexity of the imaginary persons represented and controlled in a single player game What makes his design center approach even more interesting is that game play is an integral part of it Comments Bernard Perron Associate Professor of Universit de Montr al on Lankoski s work
