

Lesson 11-2

Shrinking, Stretching, and Reflecting Parabolas

ACTIVITY 11

continued

b. $h(x) = -4x^2$

c. $j(x) = -\frac{1}{4}x^2$

4. Describe any patterns you observed in the graphs from Item 3.

5. Make a conjecture about how the sign of k affects the graph of $g(x) = kx^2$ compared to the graph of $f(x) = x^2$. Assume that $k \neq 0$.

6. Make a conjecture about whether the absolute value of k affects the graph of $g(x) = kx^2$ when compared to the graph of $f(x) = x^2$. Assume that $k \neq 0$ and write your answer using absolute value notation.

7. **Make use of structure.** Without graphing, describe each function as a transformation of $f(x) = x^2$.

a. $h(x) = 6x^2$

b. $j(x) = -\frac{1}{10}x^2$

My Notes

MATH TIP

In Item 6, consider the situation in which $|k| > 1$ and the situation in which $|k| < 1$.

action research Annotated lists of recommended resources provide suggestions for further exploration of each topic Readers new to these topics will gain a basic understanding of each and learn how to use them to create a student centered classroom More experienced educators can also benefit from reexamining these innovations and considering them as parts of a comprehensive whole Numerous examples from all grade levels along with design modules templates and checklists make this an invaluable guide for teachers and administrators Note This product listing is for the Adobe Acrobat PDF version of the book

Making Pre-Algebra Come Alive Alfred S. Posamentier, 2000-07-21 Activities in Pre Algebra is a set of versatile enrichment exercises that covers a very broad range of mathematical topics and applications from the Moebius strip to the googol Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we want this book to achieve the goal of being attractive to people who thought they didn't like mathematics To accomplish this it is necessary for the activities to be quite different from what students encounter in their basal texts different in both substance and form This seems especially critical no matter how excellent a basal text is being used nearly every class experiences the blahs Unfortunately this sort of boredom is often well entrenched long before the teacher and perhaps even the students are aware of it Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject

Planting the Seeds of Algebra, PreK-2 Monica Neagoy, 2012-04-20 The subject of algebra has always been important in American secondary mathematics education However algebra at the elementary level has been garnering increasing attention and importance over the past 15 years There is consequently a dire need for ideas suggestions and models for how best to achieve pre algebraic instruction in the elementary grades Planting the Seeds of Algebra will empower teachers with theoretical and practical knowledge about both the content and pedagogy of such instruction and show them the different faces of algebra as it appears in the early grades The book will walk teachers of young children through many examples of K-6 math lessons and unpack step by step the hidden connections to higher algebra After reading this book teachers will be better equipped

Bringing Out the Algebraic Character of Arithmetic Analúcia D. Schliemann, David W. Carraher, Bárbara M. Brizuela, 2006-08-29 Bringing Out the Algebraic Character of Arithmetic contributes to a growing body of research relevant to efforts to make algebra an integral part of early mathematics instruction an area of studies that has come to be known as Early Algebra It provides both a rationale for promoting algebraic reasoning in the elementary school curriculum and empirical data to support it The authors regard Early Algebra not as accelerated instruction but as an approach to existing topics in the early mathematics

curriculum that highlights their algebraic character Each chapter shows young learners engaged in mathematics tasks where there has been a shift away from computations on specific amounts toward thinking about relations and functional dependencies The authors show how young learners attempt to work with mathematical generalizations before they have learned formal algebraic notation The book suitable as a text in undergraduate or graduate mathematics education courses includes downloadable resources with additional text and video footage on how students reason about addition and subtraction as functions on how students understand multiplication when it is presented as a function and on how children use notations in algebraic problems involving fractions These three videopapers written text with embedded video footage present relevant discussions that help identify students mathematical reasoning The printed text in the book includes transcriptions of the video episodes in the CD ROM Bringing Out the Algebraic Character of Arithmetic is aimed at researchers practitioners curriculum developers policy makers and graduate students across the mathematics education community who wish to understand how young learners deal with algebra before they have learned about algebraic notation
