

SUPA Forensics

Course Description

Forensics will explore the science behind criminal investigation; it is the application of science to law. We will investigate actual case histories and, with an increasing background in the subject area, come up with clues and answer questions presented by scientists and law enforcement agencies. Topics covered will include forensics chemistry, biology, earth science, physics, pathology, odontology, entomology, and anthropology to name a few. We will be following cases and articles from news sources on a daily basis as well as individual projects each marking period. This is a college level course. Minimum averages, as stated by MHS policy for honors and advanced courses, will be required to remain in the class.

Procedure

Class meets one period daily. Some activities will require after school work.

Laboratory and case study requirements

We will be performing labs and case study investigations that will require write-ups and further research. Procedures for each assignment will be explained in class. Successful completion of each and every activity is a requirement for completion of the course. Access to the library and computer labs will be done at first with teacher assistance to help with resource tools, then on your own. Access to the S.U. library and database are also available.
