Climate Technology, Gender, and Justice Tina Sikka,2018-12-14 This book is the first to undertake a gendered analysis of geoengineering and alternative energy sources Are either of these technologies sufficiently attendant to gender issues Do they incorporate feminist values as articulated by the renowned social philosopher Helen Longino such as empirical adequacy novelty heterogeneity complexity and applicability to human needs The overarching argument in this book contends that while mitigation strategies like solar and wind energy go much further to meet feminist objectives and virtues geoengineering is not consistent with the values of justice as articulated in Longino s feminist approach to science This book provides a novel feminist argument in support of pursuing alternative energy in the place of geoengineering It provides an invaluable contribution for academics and students working in the areas of gender science and climate change as well as policy makers interested in innovative ways of taking up climate change mitigation and gender

Critical remarks on current practices of data article publishing: Issues, challenges, and recommendations Quan-Hoang Vuong,Viet-Phuong La,Minh-Hoang Nguyen,2024-08-19 The contribution of the data paper publishing paradigm to the knowledge generation and validation processes is becoming substantial and pivotal In this paper through the information processing perspective of Mindsponge Theory we discuss how the data article

publishing system serves as a filtering mechanism for quality control of the increasingly chaotic datasphere The overemphasis on machine actionality and technical standards presents some shortcomings and limitations of the data article publishing system such as the lack of consideration of humanistic values radical race for big data and inadequate use of expertise in data evaluation Without addressing the shortcomings and limitations the reusability of data will be hindered and scientific investment to facilitate data sharing will be wasted Thus we suggest that the current data paper publishing paradigm needs to be updated with a new philosophy of data
