Spreadsheet Modeling and Decision Analysis Cliff T. Ragsdale, 2006 **Selected Material from Spreadsheet Modeling and Decision Analysis** Cliff T. Ragsdale, 2000 *Operations Research in Space and Air* Tito A. Ciriani, G. Fasano, S. Gliozzi, Roberto Tadei, 2013-04-18

Operations Research in Space and Air is a selection of papers reflecting the experience and expertise of international OR consulting companies and academic groups. The global market and competition play a crucial part in the decision making processes within the Space and Air industries and this book gives practical examples of how advanced applications can be used by Space and Air industry management. The material within the book provides both the basic background for the novice modeler and a useful reference for experienced modelers. Students, researchers, and OR practitioners will appreciate the details of the modeling techniques, the processes that have been implemented, and the computational results that demonstrate the benefits in applying OR in the Space and Airline industries. Advances in PC and Workstations technology in optimization engines and in modeling techniques now enable solving problems never before attained by Operations Research. In recent years, the Italian OR Society AfRO (www.airo.org) has organized annual forums for researchers and practitioners to meet together to present and discuss the various scientific and technical OR achievements. The OR in Space & Air session of AfRO2001 and AfRO2002 Conferences together with optimization tools applications presented recent results achieved by Alenia Spazio S.p.A. Turin, Alitalia, Milan Polytechnic, and Turin Polytechnic. With additional contributions from academia and industry, they have enabled us to capture in print today's state of the art optimization and data mining solutions.

Statistics, Data Analysis, and Decision Modeling James Robert Evans, 2007. This book covers basic concepts of business statistics, data analysis, and management science in a spreadsheet environment. Practical applications are emphasized throughout the book for business decision making. A comprehensive database is developed with marketing, financial, and production data already formatted on Excel worksheets. This shows how real data is used and decisions are made using Excel as the basic software and including such add-ins as PHStat2, Crystal Ball, and TreePlan. This book covers a wide variety of topics related to business statistics: statistical thinking in business, displaying and summarizing data, random variables, sampling, regression analysis, forecasting, statistical quality control, risk analysis, and Monte Carlo simulation systems, simulation modeling and analysis, selection models, and decision analysis, optimization modeling and solving, and analyzing optimization models. For those employed in the fields of quality control, management science, operations management, statistical science, and those who need to interpret data to make informed business decisions.
