such spooky actions at a distance are inevitable for any physical theory not just quantum theory Since then many experiments have confirmed these long distance correlations But now in this groundbreaking collection of papers the author exposes a fatal flaw in the logic and mathematics of Bell s theorem thus undermining its main conclusion and proves that as suspected by Einstein all along there are no spooky actions at a distance in nature The observed long distance correlations among subatomic particles are dictated by a garden variety common cause encoded within the topological structure of our ordinary physical space itself *Library Journal* ,1987 **InfoWorld** ,1979-07-18 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Billboard ,1972-02-05 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends
