

STAGE 1 - ALTERNATIVE SITE PREPARATION FOR OVAL SHAPE POOLS

If you have purchased an oval shaped pool, you will find in the installation manual that you will have to form a concrete pads to support 'T' support braces. The braces are located along the straight side of the pool only.

As an alternative to forming an individual concrete base under each 'T' support, we recommend that you pour just one concrete pad to support all of the braces - please see diagrams below.

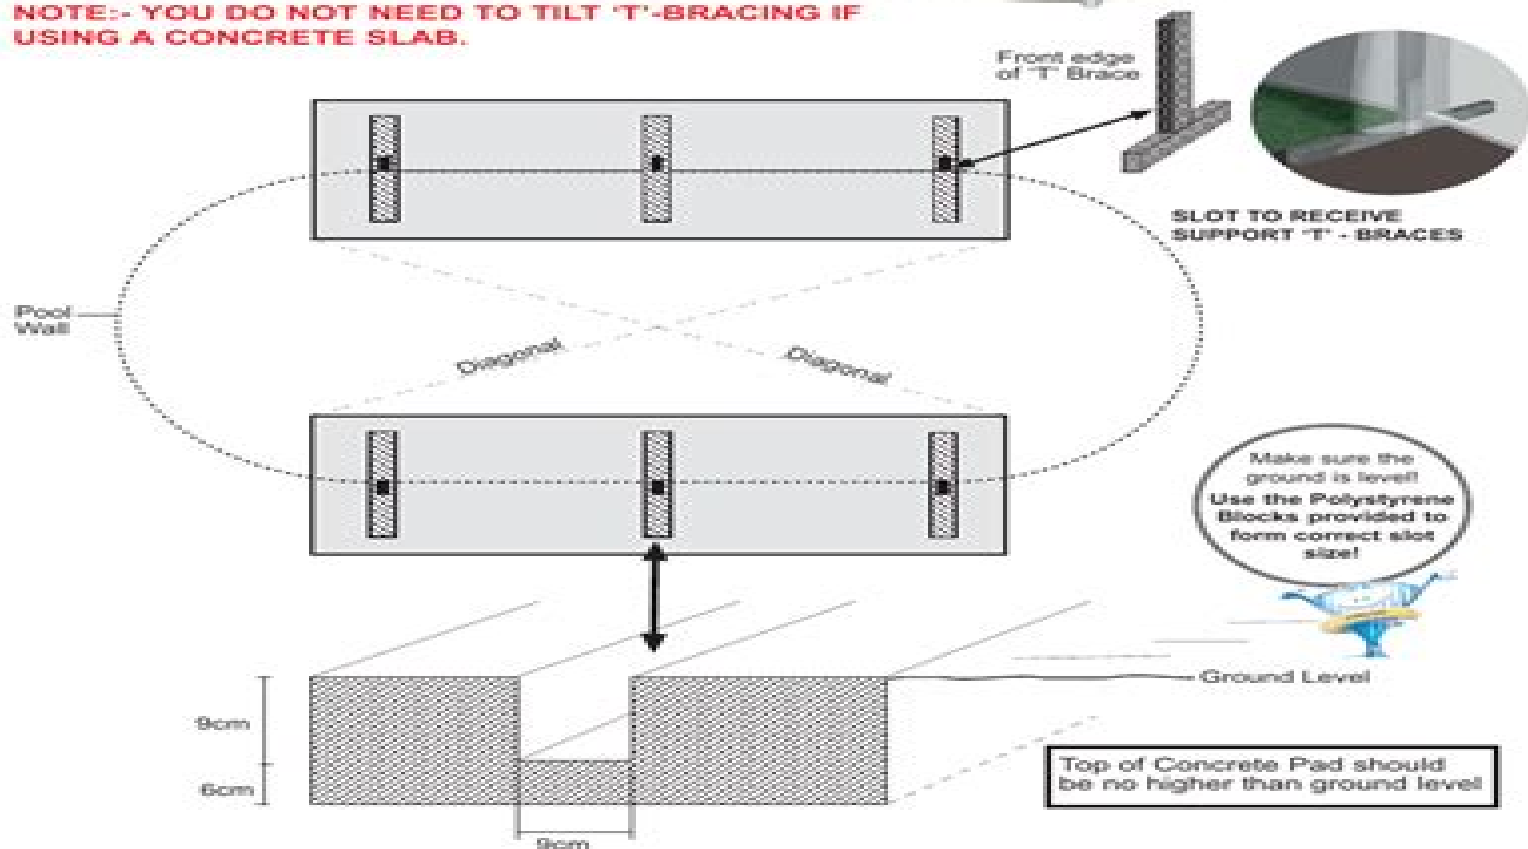

The concrete pad MUST be able to receive the 'T' Support Braces, to do this you will have to form 8cm x 8.5cm slots in a 14cm depth concrete pad(s). We have allowed for a small tolerance in our measurements, to allow for adjustment compared to the Vogue Installation Manual.

To help you form the slots in the concrete pad we have provided Polystyrene blocks to enable you to form the correct size slots when pouring the concrete. USE A 6:1 (4 x BALLAST: 1 x CEMENT) CONCRETE MIX - FAIRLY DRY. TOO MUCH WATER AND THE POLYSTYRENE WILL FLOAT!

Make sure that all visible turf is removed and the ground where you intend to install the pool is level, this is paramount to ensuring that you have a trouble free installation.

Check the diagonals are correct and that both pads are installed level. The finished concrete pad should be level with the surrounding ground.

NOTE:- YOU DO NOT NEED TO TILT 'T'-BRACING IF USING A CONCRETE SLAB.
