offers a detailed discussion of all the translation projects Bishop undertook throughout her life from Ancient Greek French Portuguese and Spanish both published and unpublished They are seen in the context of her life and work and analyzed with particular regard for the features which are relevant in relationship to Bishop s own works Bishop s work as a translator has not been explored thoroughly yet despite the huge critical interest in Bishop in the last decades and one of the aim of the book is to offer such exploration The second part of the book focuses on the ways Bishop s interest in translation and her experience of a translator is manifested in her original works Bishop s poems are read with particular attention paid to the features which relate them to translation particularly the complex interaction between the foreign and the familiar which is examined not only in her poems dealing with exotic places namely Brazil but also in texts dealing with more familiar topics and locations The final chapter argues that a crucial role in Bishop s works is played by the unknown that which is impossible to understand and translate fully The book also suggests that on a more general level a type of poetics which shares certain key features with translation could be defined
