**National Earthquake Resilience** National Research Council,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on Seismology and Geodynamics,Committee on National Earthquake Resilienceâ"Research, Implementation, and Outreach,2011-09-09 The United States will certainly be subject to damaging earthquakes in the future Some of these earthquakes will occur in highly populated and vulnerable areas Coping with moderate earthquakes is not a reliable indicator of preparedness for a major earthquake in a populated area The recent disastrous magnitude 9 earthquake that struck northern Japan demonstrates the threat that earthquakes pose Moreover the cascading nature of impacts the earthquake causing a tsunami cutting electrical power supplies and stopping the pumps needed to cool nuclear reactors demonstrates the potential complexity of an earthquake disaster Such compound disasters can strike any earthquake prone populated area National Earthquake Resilience presents a roadmap for increasing our national resilience to earthquakes The National Earthquake Hazards

Reduction Program NEHRP is the multi agency program mandated by Congress to undertake activities to reduce the effects of future earthquakes in the United States The National Institute of Standards and Technology NIST the lead NEHRP agency commissioned the National Research Council NRC to develop a roadmap for earthquake hazard and risk reduction in the United States that would be based on the goals and objectives for achieving national earthquake resilience described in the 2008 NEHRP Strategic Plan National Earthquake Resilience does this by assessing the activities and costs that would be required for the nation to achieve earthquake resilience in 20 years National Earthquake Resilience interprets resilience broadly to incorporate engineering science physical social economic behavioral and institutional governing dimensions Resilience encompasses both pre disaster preparedness activities and post disaster response In combination these will enhance the robustness of communities in all earthquake vulnerable regions of our nation so that they can function adequately following damaging earthquakes While National Earthquake Resilience is written primarily for the NEHRP it also speaks to a broader audience of policy makers earth scientists and emergency managers **Proceedings of 17th**
