

# Working with colours

You will occasionally want to validate the colour of something as part of your tests, the problem is that colour definitions on the web are not constant. Would it not be nice if there was an easy way to compare a RGB representation of a colour with a HSB representation of a colour, or a HSB representation of a colour with a RGBA representation of a colour?

Worry not, there is a solution (the Color class)

First of all, you will need to import the class

java

python

cf

ruby

javascript

Kotlin

```
import org.openqa.selenium.support.Color;
```

You can now start creating colour objects. Every colour object will need to be created from a string representation of your colour. Supported colour representations are:

java

python

cf

ruby

javascript

Kotlin

```
private final Color RED_RGB = Color.fromString("#FF0000");
private final Color RED_HSB = Color.fromString("hsl(0, 100, 50)");
private final Color RED_RGBA = Color.fromString("rgb(255, 0, 0)");
private final Color RED_HSLA = Color.fromString("hsla(0, 100, 50, 0.5)");
private final Color RED_RGBA = Color.fromString("rgba(255, 0, 0, 0.5)");
private final Color RED_RGBA = Color.fromString("rgba(255, 0, 0, 0.5)");
private final Color RED_RGBA = Color.fromString("rgba(255, 0, 0, 0.5)");
```
